# ADVANCE IS DUE IN HIGH-GRADE COFFEE

Best Grades Mostly Wanted in Short Supply.

#### CHEAPER SORTS DECLINING

Prices on Pacific Coast Average Lower Than in Middle West and East.

The coffee market has been for the last few months in rather a peculiar condition, with a number of ups and downs. Low-stade coffees, such as Blo, have declined from \$8.20 to \$9.25 per barrel. aride coffees, such as Rio, have declined quite a little during the last two months. Other low grades and ordinary grades have participated in this decline to a somewhat less extent. These sorts seem to be in ample supply, but owing to the fact that the consuming public is amply fact that the consuming public is amply two cars each to San Francisco and Stock-supplied with money to buy the better ton and one each to Cakland, Colma and grades, the low and ordinary grades are not going into consumption very fast. On the other hand, good grades and high grades and particularly the very best soris, are bringing extreme prices, regardless of what other coffees are selling at The fine grades are at present in short Tacoma. 172.897 122.993 Spokane 1,783,097 396,514 supply and are selling to arrive in very

large quantities at top prices. There has PORTLAND MARKET QUOTATIONS bringing stiffer prices than ever before.

An investigation in ruling wholesole and retail prices shows that for the last six months high-grade prices on the Pacific coast have been averaging and are now Corn. from 10 to 15 per cent lower than those ruling in the middle west and the east.

A slight advance in line roaster offee was made by the principal roasters a few days ago, but even with this advance Pacific coast roasters are not making their normal pre-war profit, nor will they be until furthed advances take place. Unless something now entirely unformed occurs it may be predicted that high-grade coffees will advance still further. At the something now entirely unforseen occurs it may be predicted that high-grade coffees will advance still further. At this same time, it must be noted, however, that the consuming public has not as yet paid for the high grades 50 per cent more than prices ruling before the war and even with the advance which seems sure to come about, prices should not rule more than 75 per cent higher than pressure than prices, as against a general average war prices, as against a general average conditume of considerably more than

#### DECREASE IN BREADSTUFFS EXPORTS nent to Date Nearly Nine Million

Bushels Less Than Lust Year,

The 30th weekly buletin covering the wheat and wheat flour movement throughout the United States for the week ended November 28, in comparison with figures for the same period a year ago follows:

KANSAS CITY STOCKYARDS, Nov. 28—The uncertain fuel situation, as it applies to the movement of livestock by railroads, has placed markets in an uncertain position. The big packing houses here are equipped to use fuel oil, and keep operating for some time; provided railroads can keep livestock moving to them. Killers this week found fower fat cattle offered than last week and bought them freely at strong prices. Receipts of 77,000 hogs in Chicago Tuesday turned the market down sharply, but the local market remained relatively high, and today regained 25c to 40c of the decline. Sheep were in scant supply and closed higher.

Fewer fat cattle were offered this werk than for some time past, and quality was the plainest of the season. No choice to prime steers were here, and the short fed grades sold up to \$15, the top. Grass fat steers sold up to \$15, the top. Grass fat steers sold up to \$15, the condition of the steers word here. Veal calves declined \$1 to \$1,250, and are quoted at \$8 to \$15,50. Killers say prime grain fat steers would bring \$10 or better. KANSAS CITY STOCKTARDS, Nov. 28
