Destruction by Fire May Result in Larger Plant.

SALVAGE TO BE VIEWED

Possibility of Saving Part of Machinery in Soap Oil Refinery Foreseen; Output to Grow.

Construction of a new copra mill. with a capacity at least two and onehalf times that of the plant destroyed Saturday, will probably be the outgrowth of the destructive fire at the local branch of the Palmolive company, according to the announcement made by C. A. Palnton, local manager, last night. Construction of the plant will likely begin within a short time, but it will be at least six months before the special manifest. fore the special machinery needed in the reduction of copra can be ob-tained, it was stated.

the reduction of copra can tained, it was stated.

The plant here was originated as the Kaola company, but was taken over about two years ago by the Palmolive concern. It continued to be operated as a separate concern until last July when it was reorganized as the western branch of the great the western branch of the great the western branch of the great three performances daily. Night curtain at 7 and 9.

capacity of 40 tons a day. The process consisted in reducing copra, the dried meat of the cocoanut, to cocoan nut oil. The new mill will have a capacity of at least 100 tons a day, in the belief of Mr. Painton. The raw product is received from the orien and the south sea Islands, and Port-and is considered to be an ideal localon for a western branch in view of the direct shipping connections with

hese points.

Mr. Painton returned 10 days ago from Milwaukee, headquarters of the Palmolive company, and during his visit at headquarters plans for a new plant here were discussed, he acknowledged. It was considered at that time that an addition to the present structure would be built next fall, but the destruction of the plant here. Saturday may hasten the action. Al-though Mr. Painton notified the com-pany fully of the disaster he had re-ceived no definite news regarding fu-ture plans up to last night.

It is considered probable that the new plant will be exceed upon a dif-

new plant will be erected upon a dif ferent site, as it is known that of-ficials of the company have been con-sidering the purchase of additional property in Portland. President Caleb E. Johnson of the Palmolive company was in the city a year ago and looked over a number of available sites at that time, bu. no action was taken.

Whether the machinery and equipment within the plant will be a total. ment within the plant will be a total wreck or whether a part of it can be salvaged had not been determined last night. Mr. Painton and other officials night. Mr. Painton and other officials of the company spent several hours yesterday on the property but were unable to get inside the building, as fires were still smoldering and firemen on the scene were throwing streams of water to prevent any possible outbreak of the flames.

As soon as possible the machinery will be removed and inspected with a view to saving and repairing as much

view to saving and repairing as much of it as possible. Oil pressing ma-ehinery such as is used by the plant is manufactured at only a few points n the east and cannot be obtained in he west at all.

This fact led Manager Painton to

fear that it would be six months at least before new machinery can be supplied and the plant again placed in operation on a large scale.
