Cost of Operation for 23 Months Fixed

IN NOVEMBER LARGE

Lowest in 30 Years.

December Returns Are Forecast as Bringing Further Reduction. Comparison Made to 1918

WASHINGTON, Dec. 2,-The government deficit from railroad operation during November will be approx nately \$64,500,000, a low record for the year, according to figures made public tonight by the bureau of raileconomics. Net operating income for the month was estimated to have fallen below \$20,000,000, which the bureau of economics declared to be the lowest in 30 years when computed on a basis of percentage of investment.

Gross revenues for the month were estimated at close to \$436,000,000. This figure is only slightly below the high mark of a year ago but the cavy expenses, due in part to the coal strike which also reduced the gevenues, left as net little of the operating revenues.

Federal Loss \$548,000,000.

The government's net loss, the bueau estimated, on the basis of interstate commerce commission figures, has reached \$548,000,000 in the months of 1919 at more than \$331 .-000,000.

December returns on the rail operation was forecast as bringing another decline, in a statement issued a few days ago by Director-General Coinage in foreign denominations Hines, who pointed to the inevitable included 2,440,000 pieces for the loss in revenues incident to the coal

The December earnings, as compared by the bureau with comparative figures for the corresponding month in 1918, follow:

56,500,000
