

# SCARLET LETTER IS BANE OF RED CHIEF

## Oster Boasts Fooling U. S. Agents.

### VEILED THREAT IS MADE

#### Mass Action Tenets of Portland Radicals Evokes Nettled Explanation From Leaders on Trial.

(Continued From First Page.)

slaughter at Centralia, was an interested spectator at the trial yesterday. He is to defend L. W. W. charged under the same sort of indictment, as soon as the district attorney's office is through with the present case.

Vanderveer had as little respect for the Montezuma jury as the attorneys for the prosecution.

"Silly, absurd!" was his comment on the verdict. "It's like saying two and two make six. How was it possible to come without premeditation? It was an idiotic verdict and ought to be set aside."

Oster had said that education was the chief aim of the communist program.

**Veiled Threat Slips.**  
"The primary object of the communist labor party is to educate the masses to go to the polls and vote," asked Evans.

"Yes,"

"When your mass action is simply to capture the country is ripe for revolution maybe your mass action staff will go good," was the nettled reply.

"What do you mean?"

"I meant your interpretation of mass action," replied Oster, restraining his temper. "Mass action means mass education to a realization of a class to their condition in society, and not a cheap cigar."

"And when the platform says that the ballot is but a secondary method, what does it mean?"

"That political machinery is only secondary—there is no hope for its use until education has been accomplished."

"What does 'dictatorship of the proletariat' mean?"

"To me it means majority rule."

"It is not 'twaddle,' then, as your attorney believes?"

"I am not bound by any opinion of my attorney."

Oster admitted telling Elton Watkins, former assistant United States attorney, that the only black spot in his life was that he was born in the United States.

Asked what he meant in a letter in which he said, "I'm going to take the Centralia frame-up," Oster declared, "I have gained that opinion of the affair from newspapers. I believe it was a frame-up by an aggregation of finance in that vicinity for the purpose of cleaning up the I. W. W. there."

**Memory Used at Will.**  
When Oster's attention was called to memoranda he had made on a personal copy of the programme of the communist party, opposite paragraphs referring to "mass action" and "other features the state maintains indicate resort to force, the witness said, "I do not propose to recollect what I thought months ago when I made those notes."

"U'ren almost committed a 'faux pas' during the morning session when he offered in evidence certain 'other local parties in Russia.' The booklet was turned over to the district attorney for examination. After glancing through it, Evans, scarcely suppressing a grin of pleasure, said, "The state has no objection."

Somewhat astonished by the willingness of the prosecution to allow the document to pass unchallenged, U'ren asked to see the pamphlet again. A hurried glance through its contents and "I'll withdraw the offer," said U'ren.

"I'm going to ask that you put that in evidence," remarked Evans to U'ren, during the noon recess.

"You'll have to get your own copy," refused the attorney, smiling. Newspaper reporters were denied permission to examine the documents, which the district attorney said was quite favorable to the prosecution.

Oster, who is 26 years old, was born in Montana and came to Portland in January, 1919. He denied, under direct examination by his attorney, that the communist labor party advocated force, violence or sabotage, or that any secret meetings had been held prior to the raid on its hall. He said he had always thought that the names of its members were kept in a card index and that he did not know that the records were by number only until after it had been called to his attention by Special Agent Bryson of the department of justice.

**Soviet Studies Admitted.**  
He admitted reading the article, "The Family and the Communist State," in a copy of "Soviet Russia" seized among others in the raid of the hall, but questions of U'ren tending to bring out his knowledge of vice conditions in Russia since the communist reign were ruled out by the court.

Oster said he had never been a member of the I. W. W. and that he had never read the manifesto of the Third Internationale, to which the communist labor party platform subscribes. He had not even read the platform and programme of the communist labor party when he joined that organization, he said.

A second attempt of U'ren to get into evidence Woodrow Wilson's definition of "mass action," as expressed in his book, "The New Freedom," met with failure, when Judge Morrow refused to permit the witness to point out the definition in Wilson's book, saying that it was not a definition adopted by the party and was not competent legal evidence.

Of 1500 socialists in Oregon but 200 had joined the communist labor party up to the time of his arrest, said Oster. He said that the reason the communist party and the communist labor party were formed was the breaking off of the left wing of the socialist party was the officialdom of the socialist party heeded little the votes of the members, refused to permit recent reformers and attempted to establish an autocracy within the socialist party.

That the red flag was the official emblem of the communist labor party was admitted under cross-examination by Oster, though he acknowledged perplexity in "splitting up the color, red," as all radical parties seem to recognize the same political flag.

**Radical Circular Analyzed.**  
Much of Oster's early examination by the prosecution was based on a mimeographed circular he had printed to send to socialists throughout the state, in which he had written, "Choose your flag. Raise it and keep it flying."

He expressed his sincere hope for the future of radicals in this circular. Explaining his definition of the term "radical," Oster said: "A radical is a person who advocates what we call 'radical' reform and ideas different from those in general use."

Oster further asserted that his admission, "If you do not decide today the change you wish to be compelled to tomorrow," meant nothing more than that fastly developing economic conditions would force them to pay attention to changes in society. The transition would be, he declared, "into the communist state, the chief object and aim of which is to produce for use rather than for profit, as in the political state of today." That would be accomplished by taking over industries, transportation, agriculture, public utilities, raw materials, etc., he said.

"And how would this be done?" asked the district attorney.

In his reply, Oster laid bare the entire contention of the defense concerning the orderly legal method which is maintained by the "red" for gaining control of the country.

**Property Rights Doubted.**  
"After having gained political control through their majority, laws could be passed which would be the will of the majority." Political control through a majority is the interpretation which the defense is placing on the "mass action" referred to in literature of the communist labor party.

"Would property owners be compensated for the loss of their property under this scheme?" asked Evans.

"Laws could be passed to compensate them," said Oster. "Yet they might not be passed; I don't know."

A copy of William C. Bullitt's report on a mission to Russia, refused admission into evidence by Judge Morrow last Friday, was admitted yesterday, as a document taken in the raid. With it, U'ren sought to show that conditions in Russia as known to the communist labor party caused them to desire "Hands Off Soviet Russia," the title of one of the pamphlets the party was circulating.

In this report to the president, Bullitt recommends withdrawal of American troops without delay, says that Canadian soldiers refused to serve there and that Lloyd George feared mutiny if he compelled the English troops to remain in Russia.

# The Aristocracy of Clothes

## HICKEY-FREEMAN CLOTHES

owe much if not most of their fame to the fact that they break away from that monotonous family resemblance which most ready-for-service clothes bear to each other. There is none of the old familiar ready-to-wear look about them. They differ not alone in the name of the maker, but in the nature of the making. They are a separate and distinct branch of the clothing family, with the blue blood of quality in their veins and the lineaments of a thoroughbred in the way they are put together.

30 CATTLE BRING \$13,495

Average Price at Klamath Falls Shorthorn Sale Is \$449

KLAMATH FALLS, Or., March 15.—(Special.)—Thirty head of cattle brought an average of \$449 at the annual Shorthorn breeders' sale Saturday.

The top price for cows was brought by "Lucael," bred by W. W. Green of Union county, purchased by W. F. Hill of Merrill, Or., for \$775.

The best price for a bull was \$700, paid by Elias Obernicher of Klamath Falls for "Lord Sultan," 16 months old, from the herd of C. O. Garrett of Glendale, Or.

Eighteen bulls brought an average of \$468 and 12 cows an average of \$374. Eighteen Shorthorn calves were distributed among members of the county boys and girls' agricultural club.

**Explosion Causes Shutdown.**  
OMAHA, March 15.—A gas explosion in a manhole through which passes all cables furnishing power to the business district caused shutdowns of many factories and stopped elevator and light service in nearly all stores and buildings this afternoon. It was said it would be midnight before service would be resumed. Theaters called off matinee performances.

**Lane Attorney Files.**  
SALEM, Or., March 15.—(Special.)—

Clyde Johnston filed today with the secretary of state his declaration of candidacy for district attorney of Lane county. Mr. Johnston is a republican.

**Project to Cost \$50,000.**  
SALEM, Or., March 15.—(Special.)—The Kingman colony drainage district with headquarters in Weiser, Idaho, has filed application with the state irrigation securities commission for the certification of bonds in the sum of \$50,000. The project is located in Malheur county and contains 2900 acres. Certification of the bonds is sought in order that actual construction of the drainage system may commence without material delay.

**Municipal Plant Proposed.**  
SALEM, Or., March 15.—(Special.)—Harnessing of water power on the middle fork of the Malheur river in Harney county for electric purposes at a cost of approximately \$350,000 is proposed in an application filed with the state engineer here today by J. Edwin Johnson of Vale. The proposed development includes the installation of a canal and power plant of capacity sufficient for municipal purposes.

**Reception to Be Tendered.**  
EUGENE, Or., March 15.—(Special.)—The Eugene chamber of commerce will tender a reception Thursday night to its new secretary, Will G. Steel, and to Attorney L. E. Bean, who was sent by the chamber to Washington, D. C., a short time ago to work for the passage of the national forest roads bill. The reception to Mr. Bean will be an expression of the appreciation of the chamber of his work. Mr. Bean will address the citizens at the regular weekly luncheon of the chamber Thursday noon and tell what was accomplished by the delegation sent to Washington.

**Water Fight Near End.**  
POWER COMPANY AGREES TO GIVE UP DAM CONTROL.

Klamath Falls Controversy Over Link River Structure Will Be Settled in Brief.

KLAMATH FALLS, Or., March 15.—(Special.)—The California-Oregon Power company is ready to relinquish its contract with the United States government for the building of the Link river dam, which includes provisions for the storage and distribution of power and irrigation water supply in the Upper Klamath lake, on assurance that the government will build the dam at once. This is according to a statement of George J. Walton, local superintendent of the company, at a conference with water users and American Legion representatives here.

The local post of the American Legion and the water users have asserted that through its contract with the government the power company could control the storage supply of the lake, and in short seasons lower it to a point where it would deprive thousands of acres of irrigation.

The agreement suggests a solution for a controversy that has stirred up much factional dispute and resulted in retarding irrigation development. Its success depends at present on the action of congress on the reclamation appropriation bill, which must pass before the government will have funds for construction.
