South Dakota. South Dakota is a typical farming state of the Middle West.

General Wood. He is strong in many other states, and is yet a formidable contender for the nomination.

Most significant fact about South Dakota is that Senator Johnson is relegated to third place.

Result in South Dakota is practically a foregone conclusion as a serious possibility and to leave Wood and Lowden as the leaders in the race.

Out-of-date remedies. The financial letter of a Los Angeles bank supplements sound advice to produce more and spend less with concrete recommendations for re-orientation of our equilibrium.

Spring gardening. It used to be a widely accepted notion in agricultural circles that "dear seed means cheap potatoes."

Government salaries and emoluments. The cry formerly was, "Let the office seek the man," but the difficulty with the government now is to make the office hold the man.

Unwritten law. American, will get into British India, where a mission from this country killed an office at a small post for reasons purely domestic.

Complimentary to teaching the boys of Oakley Green school to cook, they should have a course in splitting wood and carrying it upstairs.

Beatrice Forbes-Robertson Hale, niece of Sir Johnston Forbes-Robertson, has filed in the New York county clerk's office summons in a suit for divorce against Swinburne Hale.

Joseph Heather, the English comediennes, will leave New York in May to go to London to appear in a production.

Harper Brothers are to issue a novelization of the Winchell Smith-Frank Bacon success, "Lightnin'."

George E. Cohan, daughter of George M. Cohan, has come back to the country for an indefinite stay on her way for the first time in seven years.

George E. Cohan, daughter of George M. Cohan, has come back to the country for an indefinite stay on her way for the first time in seven years.

tally affect the public safety. A compromise between individualism and paternalism has become essential to national self-preservation, and excludes total repeal of the laws to which he objects.

NOT COMIC. The Oregonian will not refrain from expressing its pained surprise that the New York Times should refer to a revered and very popular political institution of Oregon as the "comic primary."

It is not a comic and is not a joke. It is a serious matter and one which is now being reviewed through its perfect workings.

The Times is led to its leering remark by the spectacle of Dr. Williams' name on Chiochee's bare forehead among certain obituary notices of the vice-presidential nomination in Oregon.

A person from the remote middle west named Elwood Washington and another person from the same broad region named Samuel Adams are the candidates.

Any person who describes himself as a descendant of George Washington is necessarily comic. Everybody knows that George Washington was a descendant of the older Adams family.

It is not our understanding that the late Senator Adams illuminates the confines of Oregon by his permanent presence.

separating government employees from policemen and firemen from strike organizations, because the strike of government workers might involve practically the entire force in the government service."

Loss to the government of the services of highly valuable technical employees and the simultaneous attempt of government employees in general to extort flat increases in salary by threats to blacklist congressmen are the result of a practice of making an effort to justify for home consumption a whole lot of well-tillied, is capable of making a noticeable reduction in the family grocery bill.

There is a simple way to deal with the difficulty, but it requires courage, business sense and elimination of politics. By retiring the old and inefficient on pension and by requiring a higher standard of efficiency for those who remain, congress would be able to pay as high salaries as could be obtained from private employers without increase of cost.

There seems to be needless alarm on the part of state railroad commissioners lest the Interstate Commerce commission should adopt or see fit to consider the investment accounts of the railroads in valuing the roads for rate-making purposes.

The field for criticism of the administration is so wide that it is petty for Senators Smoot, Overman and Sherman to comment adversely on the mission of Miss Julia Tallant, chief of the children's bureau, of Czecho-Slovakia.

Phil Baker, who was here at the Orpheum last week with his secretary, has been arrested by police.

Loretta Wilson, a youthful and talented Portlander, who has been in pictures in Los Angeles and more recently in stock at Tacoma with the Allen stock company, has gone to Boise, Idaho, to play ingenue roles with Majestic stock there.

Miss Graham is receiving excellent notices everywhere "Tish" plays this week the company is in Des Moines. When the tour ends in Chicago, she will disengage herself.

Beatrice Forbes-Robertson Hale, niece of Sir Johnston Forbes-Robertson, has filed in the New York county clerk's office summons in a suit for divorce against Swinburne Hale.

Joseph Heather, the English comediennes, will leave New York in May to go to London to appear in a production.

Two pioneer stockmen of Silver Lake are at the Imperial. One is A. B. Schroeder and the other T. J. LaBrie. He was a wild buckaroo when he first went into Lake county, where he has since made his home.

The trial of the case on the other charge for murder must be prosecuted with renewed vigor, for it is plain to most people who followed the evidence carefully that it was a case of premeditated murder and that is the only verdict that should have been brought in.

When we were boys we used to say of some fellow that "he has a lot of brass." That is what a friend of his remarked yesterday of James Blair Campbell of San Francisco, who can promptly fill in the form of valves and fittings for steam engines and power plants and heavy machinery.

Portland in a while someone comes to Oregon from Gold Beach in remote Clatsop county, and the man is the venture in A. V. Coughlin. Although Gold Beach is the county seat, it is not incorporated.

Think of a watch running 92 years and still keeping as good time as the day it was turned out by the maker. That is the record of timepiece H. W. Hamlin, of Underwood, Wash., carries. He was showing it at the Seward, where he is registered.

There is a good reason why the fact that it is running today without losing or gaining a second.

Geologists who have made the examination assert that one of the finest beds of coal in the west is in the Coos county, in Oregon. There are three layers of coal within six miles of Powers, and the lowest strata is the best. Also, near by there is said to be a mountain of iron ore, although there is more question about the ore than about the coal.

There is a good reason why the fact that it is running today without losing or gaining a second.

Stars and Starmakers.

"The Great Lover," in which Leo Ditrichstein starred several seasons ago and of which he was part, will open in London Easter Monday.

Two pioneer stockmen of Silver Lake are at the Imperial. One is A. B. Schroeder and the other T. J. LaBrie. He was a wild buckaroo when he first went into Lake county, where he has since made his home.

The trial of the case on the other charge for murder must be prosecuted with renewed vigor, for it is plain to most people who followed the evidence carefully that it was a case of premeditated murder and that is the only verdict that should have been brought in.
