WASHINGTON, April 1 .- President Wilson informed the house today in response to a resolution of inquiry that American troops on the Rhine still were controlled by the terms of the armistice and were subject only to his orders as commander-in-chief

"Replying specifically to the re-maining question in the resolutions of the house of representatives, I will state that Field Marshall Ferdinand Foch has no authority over the United States troops in German territory nor can anyone direct their activities without express orders from the president of the United States.

Fuel Administration Said to Have Played Into Hands of Operators by Removing Restrictions.

Field Marshal Foch of France, the president said, has no jurisdiction over the troops nor are they in any way controlled by the decisions of the allied Rhineland commission which makes ordinances and rules for the governing of the territory policed by the allied armies of occupation.

Major-General Allen, commanding the American troops, the president wrote, has authority to police the territory under his control to preserve order and "to repel any attack which may be made upon him."

In lifting price restriction by the fuel administration at this time, union officials declared, the government had "erred" and indirectly played into the hands of those op-erators. As 75 per cent of the naion's coal contracts are made about April 1, the miners say lifting the orice ban at a time when so many buyers are in the market, is sure to send prices higher than ever before. Many local hopgrowers are of the opinion that the manufacture of beer will be legalized in the United States, and in this event they predict that the price of hops will soar to \$1 a pound. Many new yards are being planted in different parts of the county, and this year's crop is expected to be greatly in excess of the production of the last few seasons. At Independence one yard containing more than 546 acres is being planted.

OREGON CITY, Or., April 1 .- (Spe ial.)-With only \$35,000 on hand to finance the construction and equipment of a gymnasium and manual training building, the school board faces an expenditure of about \$45,000, because rising prices have added about \$10,000 to the original esti-mates made. Bids were received last night and the total of the lowest proposals for the general contract, heating, plumbing and wiring was \$40,805 and did not include hardware, electrical fixtures, the fee of the architect or equipment for the building.
The board rejected all bids and will consider the situation. There are three alternatives, one of them to have the taxpayers authorize issuing \$10,000 additional bonds, the second to delay construction and the third to solicit a donation from some philan-
