TORNADOES.

The scemingly exceptional storm record of the past few days will be impressed on people both because of the number of lives lost and because of the speedy occurrence of one fatal storm after another. Following the dust storm in Kansas, which literally blew the wheat out of the ground, besides stripping whole farms of their top soil, thus reducing large numbers of farmers to poverty, the recent visitations give the impression that the world is growing stormler as it grows older. But we are reminded by reference to the records that whirlwinds have been by no means uncommon in the past; of the older residents of the middle west will tell us how he used to live publican primary in Nebraska to in constant dread of cyclones; the day, or Leonard Wood, or General cyclone cellar" was a permanent in- | Pershing.
