What About Your Furs?

Which do you prefer? To have them aired and tied up in paper and put away in a closet or trunk where you will bother about them all summer, be afraid of moths, fire and burglary. Perhaps, if lucky, take them out at the beginning of cold weather more or less wrinkled and depressed, looking old and a bit worn.

Or would you rather

Put Them in Our Cold Dry-Air Storage

on the premises? Telephone and we will send our motor for any fur or cloth garment that you may wish to store. Upon arrival here it will be carefully ticketed with your name and address, cleaned of dust and placed on its own individual hanger in the ice-cold, dry, invigorating air of the storage room, where the temperature is about 26 degrees Fahrenheit all summer long.

This cold dry air renews the life and luster of the fur so that it will look almost new when you receive it again in the autumn.

Everything stored in the Fur storage is guaranteed against moths, theft, fire loss.

This service can be had at a very moderate charge based on the valuation of the article stored.

Telephone or write us—today!
