

GOMPERS SAYS FALL PROPOSITION VICIOUS

Adoption of Senate Report Is Held Tantamount to War.

ULTERIOR MOTIVES SEEN

Mexico Asked to Turn Country Over to Predatory Interests, Says Labor Chief.

WASHINGTON, June 3.—Samuel Gompers, president of the American Federation of Labor, declared in a formal statement today that any adoption of the Senate report on the Mexican situation would result in the recommendation of the United States government to investigate Mexican affairs were carried out.

"The report of the senate sub-committee investigating conditions in Mexico under the chairmanship of Senator A. B. Fall," Mr. Gompers said, "amounts to a declaration that unless the Mexican government rewrites its constitution in accord with the ideas of the American oil and mining interests, the government of the United States will intervene in Mexico."

"The report of the senate sub-committee demands a number of specified changes in the Mexican constitution. These changes would be the consummation of what has long been the hopes of the great oil and mining interests, as well as the land timber interests, which have fomented the bitterness between the people of the United States and Mexico."

"In some minor particulars recommendations made by Senator Fall's committee may be acceptable, but the heart of the report can only be described as vicious. The report demands that unless the Mexican constitution is altered as recommended, the government of the United States send a police force, consisting of the naval and military forces, to the United States, into the republic of Mexico to open and maintain open every line of communication between the City of Mexico and every seaport and border port in Mexico."

"Of course, this amounts to policing practically the whole of the country. Those who know Mexico and the Mexican people understand fully that such action would mean war between the two countries."

"The report of Senator Fall's committee, therefore, is a report which recommends a course leading direct to war with Mexico. This has long been desired by American interests engaged in the exploitation of the national wealth of Mexico."

"Adoption by the senate of this report would constitute the adoption of a foreign policy completely at variance with the established policy and traditions of our republic. Such a course as recommended by the report of Senator Fall's committee must be opposed by every just and freedom loving American and will beyond question be unreservedly condemned by the working people of our country and the great masses of our people generally."

"It is difficult to believe that the senate will give serious consideration to a report so out of harmony with the best thought of our time, and so full of the possibilities of disturbance to our people and our nation as well as to a neighbor republic with which we are at peace."

"The report calls for American aid to Mexico providing Mexico agrees to the terms of the proposed constitution, an American proposition. This is not a Prussian proposition. It must be set aside by the popular opinion and fair judgment of our people."

MOTORISTS URGED TO SAVE GASOLINE

Strong Appeal to Citizens Issued by Mayor.

OWNERS ASKED TO HELP IN EFFORT TOWARDS NECESSARY SAVING FOR SEVERAL WEEKS.

Portland motorists are called upon to conserve gasoline for the first time during the next two weeks in order that additional allotment can be given for commercial and agricultural needs for the purpose of providing sufficient gasoline to care for production needs this month. The appeal is made by Mayor Baker, chairman of the gasoline conservation committee.

MAJOR ISSUES STATEMENT

"An mayor and chairman of the committee on gasoline conservation it becomes my duty to call to public attention the situation regarding the gasoline supply, the impending dangers thereof, and the methods of relief," reads the mayor's statement. "Investigation shows a most serious shortage extending throughout coast states, due apparently to production on a basis less than the increase in consumption. Whatever the cause may be, the shortage exists and will continue to exist for a period of about two months, according to the best information obtainable."
