Don't step on pebbles
Relieve your callouses

Walking on callouses is often as painful as stepping on pebbles.

A callous on the sole of the foot is caused by a lowered head of one of the metatarsal bones which form the ball of the foot.

Painful callouses result—pain often extending to the toes, ankle, calf, thigh, hip, back, and even to the back of the neck.

Beneath these all-leather Arch Builders and Callous Relievers, are overlapping pockets, so located that inserts of any desired thickness can

Be placed in exactly the right spot to support the dislocated bones in normal position.

Being all leather, Wizard Lightfoot Adjustable Arch Builders and Callous Relievers are light, flexible and are worn without one being conscious of them.

Wizard Lightfoot Adjustable Arch Builders and Callous Relievers are sold by leading dealers everywhere.

Usually where they are sold there is an expert who has made a study of fitting them.

If there is no such dealer near you, write the Wizard Lightfoot Appliance Company, 1627 Locust Street, St. Louis, Mo., or 926 Marbridge Bldg., New York City.
