Put On Flesh

All you have to do if you are too thin and want to put on several pounds of solid "stay-there" flesh is to take a five-grain tablet of Blood-Iron Phosphate with each meal. This builds up the nervous system, enriches the blood and thus enables the vital organs to assimilate the flesh building, strength - making elements of your food which now largely go to waste. Folks who have tried it state they not only put on flesh but that it almost invariably increases their strength, energy and endurance. You can get enough Blood-Iron tablets for a three weeks' treatment of the Owl Drug Co., or any other druggist for only \$1.50 and it's so uniformly successful that your druggist, a man you know, is authorized to refund your money if you don't like it. Better get a package today and begin to get stronger and healthier, as well as better looking.—Adv.
