SENSELESS TRADE GROUP IS MADE BY HEAT

Purchases of Grain in Country Are Halted.

GRADES DOWN 6 TO 11c

Farmers Not Ready to Accept New Quotations—Red Walls Walls Wheat Is Down 11 Cents.

Sensational drops in wheat quotations on the Chicago and Portland exchanges yesterday resulted in practically halting all purchases of grain in the country districts.

Dealers were unwilling to make purchases of wheat which had been offered the preceding day and the majority of the farmers were not ready to accept lower quotations.

The drop in wheat quotations at the northwestern markets yesterday ranged from 6 to 11 cents.

The drop was the greatest in the case of red walls wheat, which went down 11 cents, closing with a quotation of \$1.17 bid for northern delivery.

Hard winter and southern spring dropped 10 cents each, both closing at \$2.20.

The least change was recorded in the case of red winter, which went down 6 cents over previous quotations.

Bid price for that variety closed at \$2.20.

Hard white registered a bid price of \$2.23 yesterday, a drop of 7 cents.

Soft white and hard white quotations for which was 8 cents below quotations for the preceding day.

Following the sensational drop yesterday, dealers opened weak today.

They would go to \$2.00 at Chicago before the present movement was completed.

Whether there would then be a reaction resulting in a rise in quotations, they declared, would depend on developments.

A report from Broomhall received yesterday stated that wheat exchange quotations following the above advice with reference to wheat conditions:

Argentina—The visible supply of wheat is estimated at 2,700,000 bushels, compared to 4,400,000 estimated last week.

The visible supply of corn is 4,900,000 bushels, compared to 4,200,000 estimated last week.

The government has already refused to issue some permits for exportation of wheat to foreign countries.

It is estimated that 2,000 bushels of wheat left for shipment, excluding 6,000,000 bushels already purchased by the foreign government.

Roumania—The acreage of wheat and rye is larger than last year.

Bulgaria—The 1920 crop is reported to be about 20 per cent under that for the previous year.

Liverpool—Yellow 1st. Plata corn, contract grade, opened steady at 42c.

Contract grade, opened weak today, but turned very weak, sellers liquidating at the best price obtainable.

The British government has announced its intention to liquidate all holdings of the Southern Pacific company.

The report says that conditions during past week have been favorable for growing wheat in the Pacific northwest.

It is estimated that 25 per cent of fall grain has been cut, and 50 per cent of spring grain is ready to be harvested.

All grain is in splendid condition and indications are for a good normal yield.

Practically all of the grain in the Pacific northwest is in good condition.

Most of the grain has been cut and is averaging 40 per cent of normal.
