sentence, "and being drunk \$50."

Woman Keeps Her Whisky.

Arcested at her residence, 508 Raleigh street, Saturday night on a charge of violating the prohibition law, pleaded not guilty and was fined \$10. More than 15 gallons of wine and a halfpint of whisky were found on the premises, say the police. Three mendosoph Pucik, John Smith and Fred Harold, who were arrested, it is said, while drinking with Mrs. Hantok and held as witnesses, were released. Judge Deich ordered the wine confiscated, but Mrs. Hantok was permitted to keep the whisky, which she asserted was being used for medicinal purposes.

James Ross, who was arrested in a drugstore at Sixth and Glisan streets Saturday by Patrolmen Collins and Coleman and charged with having burglary tools in his possession, was sentenced to 36 days in the county jail. Ross, according to the police, went into the drugstore ostensibly to buy some medicine, but while the proprietor's back was turned, opened a showcase and took out a jewelry box. In attempting to replace this without attracting attention he dislodged a bottle of medicine which broke the glass top of the showcase in falling. His arrest followed and it was found when he was searched that a complete set of burglar's tools including a "Jimmy," pass keys, a small saw and a screwdriver, were secreted on his person, say the police.

Vagrants Get Long Terms.

Four alleged drug addicts, Charles Burk, Jess Hall, James Allen and John Craig, whom the police say are old offenders, were arrested Saturday and Sunday, charged with vagrancy, got sentences of 180 days each. Craig, who apparently is suffering from tuberculosis and who declared that his parents were sending him money each month, is to be released as soon as his remittance arrives, on condition that the money be used to travel to his home in Minneapolis.

Specialist Says Different Hair and Scalp Ailments Require Different Treatment.

Prof. John H. Austin of Chicago, who now has offices at The Owl Drug Co., has devoted over forty years to the study of hair and scalp troubles. During this time he has found that only with the aid of a most powerful microscope is it possible to determine the exact trouble with which the hair or scalp is affilicted.

People who really value their hair have come to consider a hair specialist of as much importance as doctor or dentist, for how can anyone without the knowledge or experience distinguish between such scalp disorders as neborrhoea-oleosa, seborrhoea-sica, alopeda pityrodes, etc.?

Prof. Austin says that the use of mange cures, dandruff cures, hair tonics, vaseline and elixirs is like taking medicine without knowing what you are trying to cure.

Men and women troubled with scalp aliments should see Prof. Austin, let him turn a powerful microscope upon their hair and show them these parasites that destroy the hair cells and roots, and they will be convinced that the particular trouble must be known before each case can be intelligently
