A succession of what was reported to be shots on Monday morning resulted in a squad of patrolmen being rushed to the scene early yesterday morning to make an investigation. The launch, loaded with "coppers" and island in the river and circled the island, but could see or hear nothing.

As they approached a dredge operated by the Columbia Digger company, the patrolmen were brought to attention by a succession of explosions. They approached the dredge and laid by, prepared to board. The sounds, however, proved to be only the gasoline light system on the dredge, which was working "sort of panicky."

\$25 FAILS TO GET BESS

Police and Boy Scouts Search City for Kidnap and Little One.

Bess was only a little black and tan terrier, but her friendly disposition apparently appealed to someone with a thieving disposition and a love for dogs. She disappeared from her home on her mistress, Mrs. G. L. Brown, 415 Lamm avenue, last Friday and all efforts of the police to locate her have been unsuccessful.

In the hope of recovering the animal Mrs. Brown offered a reward of \$25, but even this has so far been without results.

The boy scouts were yesterday asked to take up the hunt in the belief that they might be successful where the police have failed.

The dog had a harness studded with steel buttons at the time of her disappearance.

CHICAGO, Aug. 5.—A request that former Premier Huszar of Hungary, who is now in New York, be asked not to visit Chicago was filed today with Bertold Singer, Spanish consul here, by representatives of the Hungarian societies. The appeal was addressed to Mr. Singer because Spain is handling Hungarian interests in America. Spokenmen for the Hungarian societies said they feared an outbreak if Premier Huszar appeared here, as many Hungarians hold him responsible for pogroms and oppression of Jews in Hungary. Feeling here is so strong against the former premier, they told Mr. Singer, that it would be impossible to guarantee Huszar's life in Chicago.

Brewing Schlitz—An Exact Science. SCHLITZ cannot be made in a day or a week. Months are required for its proper aging, in order that it may not offend your stomach. From 1660, when the Dutch scientist, Leeuwenhoek, was first to examine fermentation under a microscope, through over a hundred years of experiment, when scientists demonstrated that fermentation results from vegetable activity, to Pasteur who originated the accepted process of sterilization to kill ferments after their work was complete, the brewing of a cereal beverage has been the creation of science. You who savor the smoothness, the tang, the delicious flavor of Schlitz do not realize the vast work of chemistry and biology which lies behind this master brew. No "two-day" beverage, no "green" drink, no "experiment in velocity" yields flavor and purity equal to Schlitz. Such beverages, rushed through to meet a hurried demand, will set your stomach churning, cause flatulence and indigestion. Avoid these interior discomforts; drink Schlitz. For Schlitz is fully fermented, aged, and brewed scientifically.
