

D'OILIER STRESSES SERVICE OF LEGION

Hall Crowded With Oregon Ex-Soldiers Hail Chief.

WOMEN GREET COMANDER

Radical Element Has Been Stopped by Stand of 10,000 Posts and Members, Through Is Told.

"Continued service to our country" Thus in five words did National Commander D'Oiler last night sum up the real purpose of the American Legion, the foundation stone upon which it is built and the ultimate motive which has led it to its present position by leaps and bounds and will continue to make it more powerful as the years go by.

"In a little more than a year the American Legion has grown from a mere idea to a great organization having for its members representative American men in all parts of the country, with 10,000 posts and over a million and a half members," said the national commander. "Such a growth has never been experienced before by any organization in the history of this country, and was only possible because of two things—because the Legion was not started in a haphazard way, and because the organization was planned along practical lines."

"The purpose of the American Legion is given in its constitution, which you have read. But summed up in a few words, that purpose is to keep alive the spirit of service to our country which fired the American soldiers to great deeds during the war, and to keep alive likewise the spirit of comradeship among those who answered the country's call."

"The army was nearly filled with ex-service men, with here and there doughboys and gobs in uniform among those and in 'civilian' ranks. A group of women, representatives of the Portland post of the legion auxiliary, was also in the hall.

The platform and the hall were appropriately decorated with American flags and when the national commander entered, accompanied by department officials and officers of the Portland post, he was greeted with a tremendous ovation. Following a musical program, Commander D'Oiler was introduced by the legion auxiliary of Astoria, new department commander.

On Tour of Posts. In opening his address Commander D'Oiler explained that he is on an eight week swing through the west visiting the various posts and conferring with department and local officials.

It was fortunate enough to have been one of the original 20 who met in France and discussed the formation of such an organization there. In view of that the present trip has been a wonderful revelation," he said. "It has brought me into contact with a tremendous growth of the organization in an unusually short time.

"In a few years the service men will be running this country. Not because they are service men, or because they are soldiers, but because they are the kind of organization. But he picked the same men who were the picked young men of the nation in time of need will be the men who will lead the initiative and force to take the leadership. When the war came and we responded to the call of duty for the first time felt that satisfaction which comes from service. And to service men, the duty of the future, service to our country and to our comrades.

Radicals Stopped by Legion. "Less than a year ago," he said, "the American Legion was organized, and called upon to take a firm stand upon one of the greatest questions before the nation. The men were scarcely back from France before there came the outcries of radicals and revolutionists from within the ranks of the American Legion took upon that issue with so clear that the radical element was stopped by the Legion with force in France and we were prepared to do it if need be in America. We are now dedicating our lives to the protection of our country from its foes from without and ready to give our lives, if necessary, to protect our country from its enemies within."

Although Commander D'Oiler made no reference to the call which he had in mind the outrage last Armistice day at Centralia. This morning the D'Oiler party, which will meet where Commander D'Oiler will visit the graves of the first of the American Legion heroes who were called to give their lives in the struggle with these foes from within. A tremendous reception awaits him there, according to word which has been received by the Portland post from the Centralia officials.

Tolerance His Plea. In closing the national commander urged tolerance in the matters of organization and the development of stronger ties among the posts. Commander D'Oiler, who, with Mrs. D'Oiler and James E. Darst, associate editor of the national legion publication, will be in Portland Saturday night, closes a busy visit here this morning when he leaves by an early train for Astoria. He spent Sunday in touring the highway, but yesterday was given over entirely to legion matters.

In the morning the national commander was taken by automobile to Salem, where he was the guest of Captain Post. The return was made in time for a banquet at 6 o'clock at the Benson hotel, tendered by department officials, officials of Portland posts and national delegates. The address to ex-service men at the banquet was by the national commander D'Oiler took occasion to pay a tribute to the work of Colonel White, saying that he was particularly pleased to be in Portland because it was the home of Colonel White. He said that White was one of the leaders in the formation of the legion in France and said that as long as legion members are willing to give their time so usefully to the organization its future was assured.

Following Mr. D'Oiler's address at the armory local American Legion leaders and members of the auxiliary were called upon to give their reception to the national commander was held.

not be permitted to land in Ireland. He was surprised when the commander of the destroyer broke the news that he would not even be permitted to go to Liverpool. The original intention was to land him at Fishguard, but the government wireless the destroyer ordering him to be taken to Penzance. Passengers on the Baltic were surprised by the mobilization of destroyers about the steamer.

Battle Commander Praised. Archbishop Mannix told the correspondent that the commander of the Wivern had shown great courtesy and "left nothing undone to make my involuntary cruise as comfortable as possible."

LIVERPOOL, Aug. 9.—Naval officers from British torpedo-boat destroyers boarded the steamer Baltic when she arrived off Queenstown last night and presented orders to Archbishop Mannix from General Sir Nevil MacReady, the military commander in Ireland, and from Field Marshal Sir Henry Hughes Wilson, chief of the imperial staff, according to the Right Rev. Daniel Foley of Ballarat, who arrived on the liner today.

General MacReady's order forbade Archbishop Mannix to land in Ireland. General Wilson's communication informed him he must be taken to Manchester, Liverpool or Glasgow.

Technical Arrest Made. The archbishop refused to leave the ship.

NATIONAL AMERICAN LEGION COMMANDER AND WIFE ARE GUESTS OF

Portland. The steamer and was technically placed under arrest by an officer placing his hand upon the prelate's shoulder. The archbishop said he was taken off to a destroyer.

It was 4 o'clock in the morning when the archbishop and his secretary, Father Vaughn, arrived on board the destroyer. Father Foley said the archbishop was not heard during the voyage and mingled freely with the passengers, many of whom cheered him when he went over the Baltic's side to the destroyer.

Huge crowds had gathered in the streets of Liverpool leading to the landing stage to witness his arrival. Among them were many Irish volunteers and Sinn Feiners carrying banners. Representatives of various Irish societies and members of the Dublin and Cork corporations were present.

Sinn Fein Songs Sung. While waiting the crowd passed the time by singing Sinn Fein songs and cheering for the "Irish Republic."

PLYMOUTH, England, Aug. 9.—(By the Associated Press.) "I think the archbishop is making it worse for themselves than for me. They are putting me to a little inconvenience, but are making themselves very silly." Thus spoke Archbishop Mannix in Australia to six priests and a few newspaper men who greeted him on his arrival here tonight from Penzance.

The archbishop chatted several minutes, during which he referred witheringly to the removal of the Baltic and the restrictions placed on his movements. He proceeded for London.

LIVERPOOL, Aug. 9.—(By the Associated Press.) A large number of Irishmen met tonight in protest against the government's treatment of Archbishop Mannix. Members of the Dublin and Cork deputations were present and many other prominent Irishmen attended.

A resolution submitted by Councillor Kelly, lord mayor of Dublin, to protest against the government's action toward Archbishop Mannix was carried by acclamation. Mr. Kelly proceeded to state that Eamon De Valera had intended to spend £5,000,000 for propaganda against the British government, which the Mannix incident had saved this fund many thousands of pounds.

AGED WOMAN IS LOST. Mrs. Lewis, 80, 'Cannot Locate Friends in Darkness.

Mrs. Anna Lewis, 80, arrived in Portland last night from Lyle, Wash., and was picked up by the woman's protective bureau while she was unsuccessfully trying to find friends on the beach. She did not know their address, but said she would have found them all right if darkness had not fallen while she was hunting.

The old woman was locked up in the bureau's rooms for the night. She thought she was in a hotel and protested against having the door locked, but acquiesced when the operatives told her that the rules of the hotel required that every door should be locked from the outside.

Autoist Taken on Drunk Charge. Lawrence Hillier, 34, was arrested last night by Patrolman Kelly after his automobile had collided with another machine at Alberta street and Albina avenue. Hillier had a pint of whisky in his pocket and was charged with driving an automobile while intoxicated. Three other persons were injured in the collision.

Alleged Slugging Reported. Matt Sellar, 47, reported to the police last night that he had been slugged and robbed by two men whom he met in the north end. Lieutenant Sellar and Patrolman Hillier took him to the emergency hospital for treatment, and then locked him in the jail pending investigation of the report. The police say Sellar has been drinking.

Train Hits Truck; 1 Killed. LACOMBE, Alta., Aug. 9.—Edward Langrock, former Canadian soldier, was killed and Howard Dickson, injured when the truck was struck by a Canadian Pacific train at a crossing here today.

GRAND JURY STARTS THE TAYLOR INQUIRY

District Attorney to Sift Jail Break, Capture.

OUTLAWS WOULD CONFESS

Two of Band May Be Called at Hearings; Evidence to Decide Number of Indictments.

PENDLETON, Or., Aug. 9.—(Special.)—Gathering of witnesses for the grand jury investigation of the events leading to the murder of Sheriff T. Taylor brought out the fact that two Unatilla county citizens were in the

wind. Wherever a collection of small black specks are noticeable (like musk) the first thing to do is to use the scores of earwigs located near by.

Second—Pick out these haunts, mark them with a red wax crayon and with coal oil. This will keep insects out of this place and drive them to their other haunts.

Third—Pour scalding water over places not covered with coal oil every morning and evening. This will keep the hot water at this time because so far I have not been able to obtain a solution that is cheap enough for the general public to use. I have found several preparations put up by different chemical works that do the work and could highly recommend them as being very effective.

Fourth—Use traps, such as small flower pots turned upside down with little fine straw or excelsior in bottom, setting on stick about eight to ten inches above ground near flowers. These traps can be scalded twice daily and are very effective.

HARDING WRITES CLUB. OREGON ORGANIZATION HEARS FROM PARTY LEADER.

Presidential Candidate Promises to Be Guest of Portland Men if Western Trip Is Made.

Warren G. Harding will be the guest of the Harding and Coolidge club if he comes to Oregon, according to a letter received by the organization yesterday from the republican presidential nominee. The club received the following letter from the acknowledgment of its invitation to entertain Senator Harding, this being the first letter the nominee has sent to an Oregon political organization:

Marion, O., August 3, 1920. W. W. Banks, president, George U. Piper, secretary, Harding-Coolidge club, Portland, Or. Dear friends: I am in receipt of your message of the 23rd ult., advising of the plans for the campaign, which embraces the largest membership in the history of your locality and which you expect to raise your number to 15,000 men and women voters in Multnomah county. You further advise that you expect to have a most substantial one for both national and state tickets, and further inviting me, should I visit the city, to be invited to accept of your entertainment.

Prisoner Tells of "Riot." "Had a little jail riot," Patterson smilingly answered. "I don't know what you mean by a riot, but I'll tell you what I mean. I was in the jail when the prisoners, Owens, answered: 'Everything's all right.' Owens was standing in the main lobby of the sheriff's office and it is now presumed that he had just left the inner office, where Wyrick was attending the wounded officer and where Hart, the slayer, stood guard.

Sheriff Called by Phone. At that point, Phelps said, he suspected that something was wrong and turned back. He walked slowly out, but as soon as he was out of sight, ran to the telephone in his office and called the home of Sheriff T. Taylor. Mrs. Taylor answered the telephone.

Seven on Grand Jury. The grand jurors are S. D. Ross, H. E. Hays, J. W. Jones, R. W. Fletcher, Pendleton, James Hogdon, Weston, J. A. Schmidt, Frederick Arthur R. Coppock, Athena; H. H. Mead, Edho.

Sheriff W. R. Taylor states that two of the five outlaws have expressed a desire to appear before the grand jury and make a clean breast of their part in the affair. It is expected that every door should be locked from the outside.

GOAL OIL FOE OF EARWIGS

PESTS WHEN SPRAYED CAN'T SURVIVE, IS REPORT.

J. W. Jones, Sanitary Inspector, in Charge of Fight on Bugs, Tells Results of Investigation.

Common benzene is the most effective weapon with which to combat earwigs, according to J. W. Jones, sanitary inspector, who is in charge of the fight against the pest, according to his first report filed with City Commissioners Barbur and Mann yesterday.

In connection with this report Mr. Jones gives directions for fighting earwigs, based upon his investigations and research carried on following his appointment to take charge of the "fight" fight. The report is as follows: "After three days of experimenting and thorough study of the earwig and its habits, I submit the following report: "The most effective remedy found so far in combating the earwig is common kerosene (coal oil), which, if used as a spray, will kill all the insects on the wall, ceiling, and furniture. The old earwig haunts frequently, and the earwig will not return to this spot so long as there remains a trace of kerosene on the wall. If all the residents whose places are infested with earwigs will comply with the following rules they stand a good chance of controlling and possibly exterminating the menace: "First—Locate the earwig haunts frequently, and the earwig will not return to this spot so long as there remains a trace of kerosene on the wall. If all the residents whose places are infested with earwigs will comply with the following rules they stand a good chance of controlling and possibly exterminating the menace: "First—Locate the earwig haunts frequently, and the earwig will not return to this spot so long as there remains a trace of kerosene on the wall. If all the residents whose places are infested with earwigs will comply with the following rules they stand a good chance of controlling and possibly exterminating the menace: "First—Locate the earwig haunts frequently, and the earwig will not return to this spot so long as there remains a trace of kerosene on the wall. If all the residents whose places are infested with earwigs will comply with the following rules they stand a good chance of controlling and possibly exterminating the menace: "First—Locate the earwig haunts frequently, and the earwig will not return to this spot so long as there remains a trace of kerosene on the wall.
