# ADEQUATE SUPPLY OF CEREALS IN WORLD

### SURPLUS FROM LAST YEAR

Importing Countries Producing More and Exporters Will Have Large Quantities to Ship.

An adequate world's cereal supply is it dicated by statistics gathered by the in-ternational institute of agriculture. This

ternational institute of agriculture. This information is opportune, coming at a time when the question of the worlds grain supply is of surpassing interest in every country.

There were on April 1 of this year, according to the institute, 105,000,000 quintals of wheat and rye available for shipment from experting countries. A quintal you work pounds, 22,000,000 were in North America, 32,000,000 were in North America, 32,000,000 were in North America, 32,000,000 in South America and 13,000,000 in South Am leave a surplus available in the coming season. According to the figures first quoted, this surplus should be 24,000,000 quintals on August 1, but it may have been even larger in the probable event of insuf-ficient means of transporting the whole \$1,000,000 quintals within the limits of the four clesing months of the past season. As for production in the new season. the generally favorable character of the summer points to a good harvest in the importing countries of Europe. If the mise is realized, it may be assumed that the aggregate requirements of the large importers will be appreciably

ens than in the past year.
It is doubtful whether Roumania, formerly an exporter, can do anything materia toward the world's supply this season, ow-As regards Russia, there are no means of forming a definite opinion. Brit-ish India has had a larger crop than last year, and even over average. It therefore seems probable that exports will recom-mence this scaron after their suspension mence this season after the following the United States expects a crop falling short of 1919, but above the average of pre-war seasons. The Canadian crop is doing well and the yield may be considership larger than last year's.

Taking into account the old-crop stocks remaining on hand at the opening of the new season, it may be assumed that the available exportable surplus of wheat and tye from North America during the season will be greater than the quantity experted in the past season

The outlook for the year, says the institute, may therefore be summarized, so far as the present situation indicates, as one which does not justify any serious anxiety ither with respect to the needs of the upporters, or to the extent of available supplies in the exporting countries.

WOOL MARKET OUTLOOK BRIGHTER

Resumption of Operations By American

Woolen Company on September 13..

BOSTON, Sept. 3.—The Commercial Bulletin tomorrow will say:

"The outlook for the wool market is considered by many in the trade to be a little brighter as a result of the announcement of resumption by the American Woolen company, September 13, and the continued strength at the London colonial wool suctions. Rather more interest has been shown in the market here also, but at low prices.

KANSAS CITY, Mo., Sept. 3.—Cattle—Receipts 3000, she stock dull, steady to unevenly lower; other clauses quiet but about steady; undertone weak except series, \$15.

ABERDEEN, wasn. sept. s.—(spe-cial.)—Mrs. E. Smith, an employe of the Elma Steam laundry, was burned yesterday by a fire started by an explosion of a revolving cleaning ma-chine. Prompt action by employes of the establishment prevented spread of the fiames.

The explosion occurred immediately after a suit of clothes had been put in the machine for cleaning. The machine is partly filled with gasoline when in use, and it is the theory of naundry employes that a match in a pocket of the suit was ignited by friction before it became wet. How About Superphosphate?

**FERTILIZER** 

Before ordering your supply consider our prices which are right. We offer the standard grade made by the Mountain Copper Co., 16% to 17% soluble phosphoric acid, at the following prices for

In Car Lots (F. O. B. Cars, Portland Freight Rates) at

\$35.00 per Ton

In Ton Lots, F. O. B. Portland, at \$37.00 per Ton

Before placing your order with any salesman insist upon knowing the analysis, which must be guaranteed under our state laws. Also insist upon knowing the manufacturer's name. The analysis will determine the value of the fertilizer.

We do not claim superphosphate to be a complete fertilizer as it contains only one of the three main elements in plant food, this being phosphoric acid. Nitrogen and Potash are lacking to make a complete fertilizer.

However, it is a valuable and economical fertilizer and has given successful results on grain, potatoes, etc.

Write us for quotations on other fertilizers

GILL BROS. SEED CO.

CENTRALIA, Wash., Sept. 2.—(Special.)—The city commission yesterday adopted its estimate of expenses and receipts for 1921. The estimated expenses are \$162,327.45 and the receipts \$105,125, leaving \$57,202.45 to be raised by taxation. This necessitates a 21-mill levy, the same as last year. Objections to the budget will be heard by the commission Oct. 4.
