

FARMING AREA IN NORTHWEST GROWS

Census Shows Big Gains in Number of Farms.

FEW COUNTIES SLIP BACK

Lane Leads in Oregon and Yakima in Washington—Figures of 3 Census Periods Given.

OREGONIAN NEWS BUREAU

Washington, Oct. 7.—Figures on the agricultural growth of Oregon, Washington and Idaho announced by the census bureau today show that the gains in the number of farms are quite uniformly distributed throughout all sections of the three states.

Here and there a county has slipped back from the showing made in the 1910 enumeration, it appears, on the face of the returns, but the census bureau explains that the figures are in the three states the figures are not strictly comparable because of changes in county boundaries.

Idaho Second in Growth. In the case of Idaho, which is second state in the union in rate of growth in the last ten years, many counties show a loss from ten years ago because they have lost large areas by the creation of new counties since the census of 1910.

Lane county leads in Oregon with a growth from 2576 farms in 1910 to 3270 in 1920. Yakima county leads in Washington, growing from 2341 farms in 1910 to 5755 in 1920, and Twin Falls county is ahead in Idaho, jumping from 1295 farms in 1910 to 2746 in 1920.

Figures Show Development. Figures for the three states for 1920 with comparative figures for 1910 and 1900, wherever available, follow:

Table with columns for State, County, 1920, 1910, 1900. Lists counties for Oregon, Washington, and Idaho.

RED GOLD FOR COMMERCE

\$339,636 Shipped to U. S. Goes to Esthonian Business Agent.

WASHINGTON, Oct. 7.—The recent shipment of Russian gold, of which was reported by the Federal reserve board last week, was imported for an entirely proper commercial purpose, the department of justice announced last night. The shipment was sent from Reval, Esthonia, and consisted of a commercial agent of the Esthonian government, it was stated.

BIG STRIKE IN PORTUGAL

Government Reported Convicted. Tie-Up of Revolutionary Nature.

MADRID, Oct. 7.—Reports that a general strike has been declared throughout Portugal are confirmed by travelers from that country arrived at Badajoz. Postal, telegraph and telephone workers, naval reservists, bakers and dock laborers have all ceased work, and the majority of the railway men have walked out, although in a few localities trains are being run.

Two Women Swallow Poison.

BEND, Or., Oct. 7.—(Special).—Two Bend women swallowed poison last night with nearly fatal results. Mrs. Jeannette Finley took an ounce of tincture of iodine and was saved by the prompt administration of anti-dotes, and Mrs. Albert Esteban drank two ounces of lysol, later receiving stomach-pump treatment.

JAPANESE ARE DUBIOUS

EARLY SOLUTION OF CALIFORNIA PROBLEM DOUBT.

Conclusion of New Treaty With U. S. Held Excellent in Principle, but Difficult Task.

TOKIO, Oct. 6.—(By the Associated Press).—Proposals that a high commission be appointed to reach an agreement on the issues which have caused tension between Japan and the United States are opposed by Viscount Takasaki Kato, member of the house of peers, and former minister of foreign affairs, says the Jiji Shimpo. He is quoted as saying a commission of the kind contemplated could not pass upon the points raised by the anti-Japanese movement in California.

Conclusion of a new treaty which would insure equal treatment of Japanese and other aliens, he is quoted as saying, "would be excellent in principle, but would be difficult of attainment at present. I believe the anti-Japanese question will remain a

knotty problem, irrespective of the result of the presidential election in the United States.

American members of the American-Japan society have adopted resolutions to be cabled to the Japanese society of New York stating that it is felt that America should be informed of the intensity of feeling caused in California by the legislative action contemplated in California which threatens estrangement of the two peoples and destruction of their long-standing friendship.

LEAGUE RALLY CALLED

CHAIRMAN WHITE DECLARES ONLY HOPE WITH DEMOCRATS.

Senator Harding's Stand Calls Forth Comment From Bourbon Committee Chief.

NEW YORK, Oct. 7.—(Special).—George White, chairman of the democratic national committee, in commenting today on Senator Harding's rejection of the league of nations and his announcement that the United States, if he is elected, shall not join in a world contract to prevent outlawing and rulers henceforth disturbing the peace of the world. This makes a clear-cut issue. I have hoped for this from the first. We shall now have an unmistakable referendum on this great question.

"The increase since 1910 in the population as a whole, as before stated, was 14.9 per cent, but during the decade there has been an increase in that portion of the population living in urban territory of 15.82 per cent, or 28.5 per cent and in that portion living in rural territory of 15.18, 0.16, or only 2.1 per cent.

Small Towns' Census Falls. If the comparison is extended to cover the two classes of rural territory, it appears that that portion living in incorporated places of less than 2500 inhabitants shows an increase of 1.745, 271, or 21.5 per cent, whereas that portion living in purely country districts shows an actual decrease of 227,365, or 6.10 of 1 per cent.

The percentages of increase shown for the several states vary greatly, due in part to the causes which have been noted as affecting the increase in the population of the country as a whole, but also in part to the abnormal internal movement of population required to meet the excessive demands of the war in certain sections. For three states—Mississippi, Nevada and Vermont—there have been small decreases in population, the largest decrease being for Nevada of 5.5 per cent.

Other census figures announced today were: State of Pennsylvania, 8,720,153; increase 1,055,948, or 13.8 per cent. Ohio, 5,759,308; increase 992,247, or 20.8 per cent.

Low 2,408,630; increase 178,853, or 8 per cent. Michigan 3,667,322; increase 857,049, or 23.38 per cent. Virginia, 2,306,261; increase 244,749, or 11.9 per cent.

Arkansas 1,750,935; increase 176,546, or 12.2 per cent. Florida 966,296; increase 213,677, or 24.8 per cent.

Nebraska 1,295,502; increase 103,388, or 8.7 per cent. Minnesota 2,386,371; increase 310,683, or 13 per cent.

Louisiana 1,787,798; increase 315,406, or 17.6 per cent. Cities of Detroit (revised) 935,678; increase 527,912, or 113.3 per cent; previously announced 957,739.

Philadelphia 1,250,502; increase 182,778; increase 274,771, or 17.7 per cent; previously announced 1,423,158.

Population of two states in the 1920 census, made public tonight, showed Minnesota to have moved into 17th place, passing Tennessee and Alabama, with a population of 2,386,371. Nebraska, with a population of 1,295,502, an increase of 103,388, or 8.7 per cent, dropped into 31st place, Washington and Connecticut having passed it in the 1920 census.

Iowa's population, announced today as 2,408,630, an increase of 178,853, or 8 per cent, more than made up for the decrease shown for the state in the 13th census.

Growth Shown in Table. The growth of the country's population, exclusive of the outlying possessions, is set forth briefly in the following table:

Table with columns for Year, Population, Increase, Per Cent. Lists years from 1910 to 1920.

Two Bits per Capita

There has been a great clamor recently about political campaign funds that are alleged to total fifteen or twenty millions.

At a dollar per family, the dough bag would have to contain \$22,000,000 or about 25c per capita.

It is customary to make all dreadful appeals to the imagination of the common peep in terms of aggregate millions.

Advertising campaigns that sound wondrous and prodigal in total, shrink to an apparent, pitiful inadequacy in terms of two bits per capita per year, and yet no such huge fund for advertising has ever existed.

A few cents per capita per year would make an advertising appropriation for any manufacturer so large as to almost warrant its being "viewed with alarm."

body will by law fix the number of representatives from each state. There has been discussion as to whether the membership of the house of representatives, now fixed at 435, should not be reduced so that number is considered by some parliamentarians as too large and unwieldy a body. People of some states are fearful that their representation in the house might be cut down and oppose any reduction.

In 1790 the number of representatives was fixed at 65, each representing approximately 30,000 people. The number has increased with each decade, based on census returns, until the present 435 members of the house represents approximately 211,877. The actual ratio of representation varies from 80,292 in Nevada to 228,927 in Washington.

Nevada, Delaware, Wyoming and Arizona, whose populations were less than the number which would entitle them to one representative by apportionment, each received one unexpired constitutional provision that each state shall have at least one representative in the house.

Rank of States Changed. Some changes have occurred in the rank of the states and the District of Columbia during the ten years. Connecticut has outgrown Wash-

Utah has gone ahead of New Hampshire. Oregon has passed Maine. The District of Columbia, included in the ranking of the states by the census bureau, has outgrown Vermont.

The ranking of some of the states, with their 1920 and 1910 populations, follows:
