State Market Commission Bill

# DENOUNCED!

20101-10101

## By Successful Farmers

TILLAMOOK COUNTY CREAMERY ASSOCIATION W. H. Christensen, President Carl Haberlach, Secretary-Salesman

At the last meeting of the directors of the Tillamook County Creamery Association, a resolution was adopted that the Asso-ciation go on record as opposed to the Market Commission Bill, appearing on the November balls.

The proposed bill would put marketing control of Tillamook cheese in the hands of a political appointee, over whom the farmers here would have no control.

The farmers have their own ideas of what this might mean The writer has spent over seventeen years assisting the farm-rs in building up an organization and a reputation for Tillamook

The proposed bill would undo a lot of our work, and we would ave no more control of our own affairs than the man in the

moon.

\*Can you wonder that Tillamook farmers are up in arms and doing everything they can to oppose this bill?

We believe in co-operative marketing, the selling of a product by the people producing same; we do not believe in state control in any manner, form or shape. If the proposed bill provided for a voluntary submission, it would not be so bad, but this bill provides for heavy fines in case we did not submit to dictation.

WE THINK THAT THE PEOPLE OF OREGON SHOULD DEFEAT THIS BILL and if the farmers desire, an effort should be made to get the legislature to enact a bill, after hearing all parties interested.

We know who originated this bill, and while they are a lot.

We know who originated this bill, and while they are a lot of good men, this bill, in their case, is altogether gratuitous, and is intended as a work to fight the Non-Partisan League. The Non-Partisans are trying to do what this bill intends doing-STATE CONTROL OF PRIVATE EFFORT. My experience during all these years has taught me that arketing a product of the soil is anything but a philanthropic oposition—it is a cold-blooded business proposition in every

It takes a lot more than drawing up a bill for people to vote upon, promulgating a constitution and set of by-laws, to make a successful co-operative venture. Possibly a thousand concerns have been started where you could count the really successful ones on the fingers of one hand.

In order to get a successful organization, you have to have real management and co-operation from every one interested. Otherwise you will go against the rocks every time. "I think it can be said that Tillamook is probably the most successful co-operative venture in Oregon; it has stood the test of years, and is running smoothly. And our people are altogether against this measure, because they do not want to lose control of their own affairs.

The bill provides for an appropriation of \$50,000.00, salary of \$4500.00, for director; secretary at \$3660.00, and attorney fees without limit. It would, of course, be much easier to get an attorney on the terms mentioned than a good man for market director.

It would take a veritable Moses to lead the people as this bill provides, but so far, we have heard of no Moses who might be in sight. Any market director should be somewhat in control of the parties or interests whose product he is to control in no instance should be be under political control, which is too often one of expediency, and not of merit.

It is known that California products were successfully sold co-operatively long before they had a market commissioner. Their first commissioner was a press agent unto himself; we have never heard the name of his successor. No, we are opposed to this bill from self-interest and because we think, altogether, the bill is unwise. Plausible arguments are put forward for co-operative marketing and a lot of it sounds good, but IT IS SIMPLY AN ENTERING WEDGE FOR THE NON-PARTISAN IDEA, STATE CONTROL OF PRIVATE BUSINESS.

(Signed) CARL HABERLACH, Secretary.

#### By Businessmen—

Resolution passed by Oregon State Retail Merchants' Association. It appears to us that the enactment of the "State Market Commission" bill would be more productive of expense to the taxpayers, than of any real benefits to them, and in state, in nation, and in town and country, we appear to be agreed that faxes should be lowered rather than raised, and this can never be realized if we continue to increase the army of government em-

ployes, with not only their salaries, but with their varied expenses. The way is wide open now for co-operative efforts among producers or among consumers. No further legislation is required, therefore, to enable any who wish to participate in
