Are you a skilled man? Are you satisfied with your job and your prospects?

Have you ever wanted to be a surveyor-or radio operator-or to hold down a technical job?

There's where the big pay is-and getting it is only a matter of knowing enough.

If you want to know more, the Army is a great place to learn.

A soldier has a chance to learn to be expert in one of many technical jobs. He earns a good living while he's studying. He has money in his pocket at the end of every month. It doesn't cost him a cent to fit himself for a "bigpay" job when he goes back to civil life. And he sees new places and faces while he's earning and learning. It's a good job-an unusually good job as jobs go, nowadays-and it is a way to a better job afterwards. Ask a recruiting officer.
