amounted to 1018. According to R. A. Ward, organization manager, the association is signing up about 1000 sheep a day In western Oregon. It now ranks as one of the strongest in point of membership of any of the co-operative marketing organizations in the state. Its growth has also been the most rapid. When the organization committee secured its organization manager, there was less than 10,000 sheep signed up. Since that time in the space of two months, this has increased to

markeling wools. The value of the utiliza-tion of the United States licensed ware-house system, which provides for accurate and licensed grading, scouring, balling and the other processes which go to enhance the value of wool and to put it in a mer-chantable condition, is quite generally rec-possinged by the more progressive grower. chantable condition, is quite generally recchantable condition, is quite generally recchantable condition, is quite generally reccontised by the more progressive growers.

The association's latest Boston advices indicate that the last few days have brought out considerable buying on the part of the larger mills at clean costs which figure somewhat lower than previ-ously for territory wools. The govern-ment wool auction showed a better clear-

Mexicans Lead in Recovery.

NEW YORK, June I.—Liquidation was heavy in today's stock market, but there was a sharp raily before the close. Gross declines of 1 to 5 points in standard stocks and 5 to 16 points in standard stocks and 5 to 16 points in standard stocks and 5 to 16 points in speculative issues were parity or fully recovered.

Early dealings indicated that much of the selling was caused by weeding out of impaired margin accounts. Such action, traders believed, resulted from further calling of bank loans and smaller supplies of time funds.

LOGANBERRY CROP LARGE Returns to Marion Growers Esti-

mated at \$424,000. SALEM, Or., June 7 .- (Special.)-Marion county's loganberry crop for this year will aggregate 10,600,000 pounds, according to estimates made here today following a survey of the fields by fruit experts. Based on an average price of 4 cents a pound, the growers will receive \$424,000. The

growers will receive \$423,000. The increase in this season's crop over that of last year is estimated at 2,800,000 pounds.

It was said today that canneries will handle most of the loganberry crop and that the growers of this crop will fare better than the strawberry producers, who in many in-stances have been compelled to ped-die their berries from house to house.

HOW THOMPSON INSURED HIS INSURANCE

Thompson had a good position, a wife and baby, and like other prudent men he insured his life to protect his loved ones against want in the event of his death. But when his second annual premium came due he found he had not saved enough to meet it. He scraped together enough to pay the quarterly premiums a few times. Sometimes he had to borrow it. That meant embarrassment and hardship. It looked as if it would be too much for him. He was on the point of dropping his insurance and leaving his family without protection when his agent suggested that he

"Join Our Insurance Savings Club"

Now out of every salary check, he regularly sets aside enough to enable him to meet his premium annually in advance. Every pay day finds him at our savings window making a deposit. His funds will always be available when his premium comes due. Thompson's wife and baby shall never suffer.
