## POWER COMPANY PLANS FOR BIG FUTURE GROWTH.

### Uses for Electricity Expected to Increase—Industrial Demands to Be Met.

When the proposed 75,000-horsepower hydroelectric plant of the Portland Railway Light & Power company is completed on the Clackamas river, 25 miles above Cazadero, this company will have the largest power plant of the kind in this section of the country, company officials said yesterday. The plant would double present capacity. It is stated that the entire present power developed in the state approximately is one-quarter million horsepower.

"The reason we are planning to double our present power is that we are looking forward to an era of good times over a period of years," O. B. Caldwell, second vice-president of the power company, said yesterday afternoon. "Through a long period of years the electric load has had an annual growth from 8 to 12 per cent per annum."

The Pacific International Livestock exposition is the great annual livestock show of the west, said Mrs. Strandberg, and is an institution in which all citizens of the northwest, and of Portland in particular, should take great pride. It is the largest stock show in the world, and is held in the largest stock show building in the world, the pavilion with its latest extensions now covering a full ten acres. The purpose of this annual event is to stimulate and develop the two great basic industries of agriculture and livestock, upon which all other industries and business enterprises are dependent.

Mrs. David Irwin, retiring president, reports that the society gave twice as much this year as in any past year. Mrs. E. K. Royal is the president to be installed.

There are two sources of revenue which provide the support for the Pacific International. These are the gate receipts from the annual stock show and night horse shows, and the money derived from the sale of space for manufacturing and business exhibits in the new exhibits building, through which the thousands of stock show and horse show visitors will pass to enter the pavilion proper. You can all help the stock show in two ways. Help increase the attendance by being enthusiastic booster, whenever the opportunity presents, and urge your firms to take exhibit space and display their goods during stock-show week, also to dress their show windows so as to call attention to the stock show and night horse shows previous to and during stock-show week, November 8-12. The attendance last year was 66,000, and 150,000 has been set as the goal for this year. Already we have the largest stock show in the world, housed in the largest stock-show building in the world. Help us to make it the world's largest stock show in point of attendance also."

The Cause of Your Ailments

**WHY?** Study the photographs taken of normal and abnormal spine. Note in the abnormal spine the contraction or settling of series of vertebrae, due to the thinning or shrinking of the cartilages between.
