EVERY citizen should contribute to make the 1925 exposition a success, in the opinion of E. J. Jaeger, since each citizen will share in the benefits. He said: "It seems strange, when Portland is confronted with a large enterprise of this kind that requires the raising of a little money, that we have the usual coterie of citizens who sit back and find fault with this or that and make the same old excuse that it will increase taxes."

"I remember quite clearly, when our Lewis and Clark exposition, held in 1905, was first mentioned, we had the usual number of persons who complained as to the cost and were inclined to put it off for a few more years. The exposition took Portland out of the village class and placed it among the leading cities of the United States, and it has had a steady growth ever since. Why? Because it advertised this part of the country. "The Shrine convention, held in 1920, is another example of what advertising will do. So I say, for Portland's sake let us all get our shoulders to the wheel and put our thing over in such a manner as to leave no doubt in the minds of our eastern and foreign friends that we are all heartily in favor of the fair."

Telephone Traffic The signals of the traffic officer are obeyed instantly by the intelligent citizen, as he realizes that indifference means confusion and congestion. Over the wires and through the switchboards of the telephone company there is a constant volume of traffic. Here there is also a signal—the ringing of the telephone bell. A great obstacle in the flow of this traffic is delay in answering the telephone bell. Answer your telephone bell promptly. You will accommodate the party calling. Your own line will be more quickly cleared for other business.
