NO EXPORT TRADE IN COAST WHEAT

Operations of Australian Shippers Extended.

SALES AT LOWER PRICES

Flour Offered at Mediterranean Ports 60 Cents Barrel Under Best Figure of Mills Here.

The local wheat market was higher yesterday with Chicago. Bids were advanced 3 cents on hard white and soft white, 3½ cents on white club and 2 cents on hard winter.

The market here goes up and down with the east, but it appears to be mill buying and the covering of previous sales that is keeping prices in line. There is nothing in the export situation to warrant activity or even the paying of current prices. Yesterday's cables showed that Australia is not only underselling the Pacific coast in the United Kingdom, but also in the continental markets, in Constantinople, Japan and China. Australia is likewise offering flour to Mediterranean ports at 60 cents a barrel better than the mills in this section can do.

The gulf trade is also suffering from a severe interruption to its foreign wheat commerce, as shown by the following statistics of New Orleans exports in October of this and last year and for the season to date. The figures were compiled by the Louisiana state grain inspection department:

	Bushels.
Total exports, October, 1920	8,533,202
Total exports, October, 1921	2,305,740
Decrease	6,227,462
Since July 1, 1920	51,890,836
Since July 1, 1921	22,279,030
Decrease	9,611,806

"Business is absolutely at a standstill," writes the New Orleans inspector, "and fixtures for full cargoes these days seem to be all from the Atlantic. Shippers that booked some weeks ago for the continent at 15 cents are now trying to relet."

Eastern advices reported some inquiry for durum from Italy and also said Germany bought 10,000 tons of American flour.

Terminal receipts, in cars, were reported by the Merchants' Exchange as follows:

EUROPEAN CROP PROSPECTS GOOD

General Rains Improve Situation in Most Countries.

Better grain crop prospects are reported by Broomhall in his weekly cabled summary, which follows:

United Kingdom—Weather is cold and wintry in this country. Recent rains have been favorable for crops.

France—Rainfall has been general and agricultural outlook more hopeful, although seeding is still backward.

Germany—This grower has been favored with general rains. Reports confirm that conditions are seasonable and generally favorable.

Italy—Agricultural conditions are improved as a result of good rains over a wide area.

North Africa—There seems to have been further complaints that the drouth is delaying sowing operations.

Australia—Occasional complaints of dryness have been received; otherwise prospects are generally maintained.

Denmark—This country's crops have experienced favorable rains.

FRESH EGGS SCARCE AND FIRM

Storage Stock Is Moving Out Better—Cube Butter Steady.

Fresh eggs continue scarce and the good demand keeps prices firm. Because of the short supply of fresh stocks, storage eggs are moving out better.

The cube butter market was steady and a good local and shipping demand took all the stocks offered.

Turkey receipts were of fair size and most of them went to fill out-of-town orders. The general market was around 40 cents. Live poultry prices in all lines were fairly steady.

Canned Milk Declines.

All brands of canned milk, both the large and small sizes, were reduced 35 cents a case yesterday.

EASIER MONEY FACTOR

STOCKS STRONG AND HIGHER AND TRADING ACTIVE.

Pronounced Improvement Noted in Industrial Conditions; Bond List Also Advances.

NEW YORK, Nov. 16.—Continued ease of money, signs of pronounced improvement in industrial conditions and the strength of British exchange were factors in today's active, broad and generally higher stock market, sales approximating 1,000,000 shares.

Events at Washington were followed with interest, but the speculative element, which was driven to cover, appeared to have concluded that eventually the disarmament proposals would prove a bullish argument.

Call loans opened at 4½ per cent for the first time in nearly a month and that quotation again was reduced to 4 per cent in private negotiations, slight concessions also being made for accommodations extending into next year.

Trade reviews reported a broader demand for railroad equipment and structural steel and the labor situation, in its relation to the proposed wage cut by the transportation systems, seemed less acute.

Oils of the domestic type, especially the Standard Oil group, featured trading at extreme gains of 2 to over 10 points. Royal Dutch was the one exception, showing heaviness on reports that dividends are to be paid in stock instead of cash.

Equipments, steels, coppers, shipping and many specialties participated in the advance at substantial gains and rails added variably to their recent gains. Frequent realizing sales were without marked effect, a strong tone ruling at the close.

Sterling exchange crossed $4 for the first time in nearly six months, representing gains of about 6 cents to the pound from the week's low. French, Italian, Belgian and Dutch bills also were irregularly higher and German marks displayed more stability.

Appreciable gains were made by liberty issues and the bond list, almost as a whole, including leading internationals, was inclined to strengthen. Total sales, par value, $17,750,000.
