Transferring Correspondence
The usefulness of correspondence lessens with its age. You can't tell when it is absolutely useless, but you know that reference to it decreases gradually as it becomes older.

Obviously the best transferring system is that which retires the correspondence gradually. For example, suppose your Upright Steel Filing Cabinets will contain just one year's correspondence; file the second year's correspondence in a duplicate set or battery of cabinets, placed back to back with, and labeled the same as the first; the third year transfer the first year's letters from the Upright Cabinets to Globe-Wernicke Steel Transfer Cases, stacked up in same formation as the cabinets, as shown above. Then, the Upright Cabinets or Active Files you have emptied are ready for the current year's correspondence.
