"We operate 9 tractors and 2 cars and use

an average of <u>1 gallon of Cycol a day less</u> than any other high grade oil."

# Greater Mileage -the final proof of lubricating value

Cycol Motor Oil invariably delivers increased mileage. We receive hundreds of letters from users which stress this point.

"I have used Cycol in my Dodge and get 950 miles to the gallon where I used to get

"I have used Cycol in my Dodge and get 950 miles to the gallon where I used to get 500 by using other oils."

This has a much greater significance than the saving of money on oil used. It is conclusive evidence that Cycol does not break down, thin out or evaporate rapidly under engine heat. Thus Cycol maintains the essential lubricating film, reduces friction wear and prevents costly motor troubles which result from the use of ordinary oil.

Cycol gives such phenomenal service in the motor because it is different in chemical characteristics from motor oils now known as Western "asphaltic" or Eastern "paraffine" or Eastern "asphaltic." Cycol is made from Cyclo-Naphthenic base crude petroleum. Cycol is free from destructive "sulpho" compounds. These impurities are removed by the new Hexeon Process used only by us.

Prove the superiority of Cycol for yourself. Flush the crank case, not with kerosene or so-called "flushing oils" but with the grade of motor oil your Lubrication Chart recommends for your engine, and refill with the correct grade of Cycol as specified on the Cycol Lubrication Chart. To be sure of getting genuine Cycol Motor Oil, buy it where you see the Cycol sign.

### The importance of the Lubrication Chart

Different brands of motor oils have different bodies. The safest, surest way to get the best performance from your motor and avoid expensive engine troubles due to incorrect lubrication is to use the grade of motor oil specified on the Lubrication Chart.
