The SOLO CAROLA

Did You Watch Harold Bauer's Hands When he played with the Symphony Orchestra at the Heilig Wednesday evening?

watch this great artist's hands in action and you will discover one of the secrets of the Solo Carola that has revolutionized reproducing art.

—When the artist plays delicate pianissimos, scarcely audible to the ear, his fingers are very close to the keys, the stroke short and light. —when he plays crashing crescendos, his fingers are raised high and brought down with long and vigorous strokes. —the Solo Carola achieves its human-like touch and dynamics in identically the same manner, through a miniature keyboard within the piano, upon which human-like fingers exactly duplicate the action of the living performer's hands.

Come in and hear a demonstration of this remarkable piano. Send the coupon below for catalogue.

Home work, social obligations, dress-making and the care of children keep the 20th century woman in a whirlwind of activity until headaches, dizziness, backache, nervousness and oftentimes more serious ills which are peculiar to her sex alone. Such women should not despair, but be guided by the letters so often published in this paper from women who have been in just such conditions, but who have been restored to health by Lydia E. Pinkham's Vegetable Compound. This is a root and herb medicine that contains no drugs and can be taken in safety by any woman—Adv.
