

QUAKE SITE IS PUT OFF COLUMBIA RIVER

Rift in Earth Crust Declared 100 Miles Longer.

HAWAII GETS TREMORS

Instruments in Observatory at Ewa Unable to Register Probable Location of Tremor.

NEW YORK, Feb. 1.—(By the Associated Press.)—The huge "fault" in the earth's crust, which first occurred beneath San Francisco bay, the memorable catastrophe of 1906, has become a few hundred miles longer.

This was the explanation today of Dr. Chester A. Reed, professor of geology and seismographic observer at the American Museum of Natural History, for the violent tremors of the earth, which yesterday demolished seismographs throughout America and had scientists "guessing" as to their origin.

The earthquake took place at a point beneath the bed of the Pacific ocean about 250 miles west of Portland, Or., and was an earth movement, a slipping, along the plane known as the San Andreas rift, said Dr. Reed.

Prior Shocks Recalled. In 1906 there was a remarkable earthquake caused by shifting along this plane, along the California coast from San Francisco to Cape Mendocino, in a northwesterly course. It was a further slipping along this fault which caused the remarkable tremors of January 21, 1922.

The earthquake of 1922, said Dr. Reed, was the first branch of the earth's crust beneath San Francisco. Like a cracked window pane, he said, the "fault" is spreading in each direction, until now it extends from southern California, northwestward beneath San Francisco, along the coast until it passes beneath the Pacific.

The seismograph at the American Museum was one of the few in America to witness the Pacific shocks which occurred for nearly three hours yesterday.

Record Is Remarkable. Of the record made by the wavering needle, Dr. Reed said "it was the most remarkable we have ever seen."

HONOLULU, T. H., Jan. 31.—The United States magnetic observatory at Ewa, on this island, registered an earthquake of such violent intensity early this morning that the observatory was unable to locate either the direction of the tremor or its approximate distance from this point. The seismograph indicated the earth movement started at 2:35 A. M., and reached its maximum at 3:10 A. M., continuing for more than two hours.

There is a difference of 2 hours and 30 minutes between Honolulu time and Pacific Coast time, which would place the period of registration of the tremor at Ewa yesterday morning at approximately the same time as the earth movement was recorded at the observatory on the mainland of the United States.

JANITOR ECONOMY PLAN

(Continued From First Page)

of the man's hair who convinces me of the necessity of a change."

Remark Draws Fire

The remark, aimed directly at Director Egan, drew the reply from Mr. Egan that he was ready to consider the matter of change on a business basis of a saving in dollars and cents, but not upon the mere statement that a man was favored by the properties committee.

The question was temporarily dropped off by authority of the Egan monition to go to Seattle to investigate the hour system in vogue there and bring a detailed report as to savings possible. Director Thomas asked that the board authorize him to accompany Captain Edmondson at his own expense.

Dance Question Renewed

The dance question was renewed, temporarily, by the introduction of a letter from P. E. Jackson, chairman of the committee appointed by the Glencoe Parent-Teacher association to supervise dances at the Glencoe school. By motion of the board it will be re-read at the dance investigation meeting tonight.

Mr. Jackson said that all dances at the Glencoe school were supervised by a committee of 12 men selected by him. Charges made by Dr. Charles MacCaughy that the dances conducted at the school were grade school dances were absolutely false, according to a statement of the letter, which went on to say that the dances have been attended by from 225 to 250 high school students with 25 or 30 parents in attendance and four or more members of the committee at the auditorium. Also a woman is kept on duty in the girls' cloak room and someone is stationed at the door to see that no one leaves except to go home or no one enters who should not be in the school, the letter declared.

Allegations Are Denied

Allegations of Dr. MacCaughy that the school dances were the only place in the city where the worst type of dancing could be held, he said, were without foundation, the letter said. The admission to the dances is confined solely to young people of high school age and the parents of the students. No men of mature age, other than a parent, would be allowed upon the floor, it was pointed out, and if Dr. MacCaughy himself attempted to dance upon the floor he would not be permitted to. No grammar school children are admitted except with their parents.

"Jazz dancing or rough dancing, romping or loud talking are not permitted in the building at any time during the evening," the letter continued, and went on to say: "A week ago I asked the young people who were in attendance at the dance what they would do if the board should close the auditorium. The reply was, 'Find some other place to dance.'"

Better Plans Asked For

"Now, gentlemen, consider well before you close the school auditorium to the young people. It will force them to go to a public dance, which has no protection whatever. If there is anyone who will visit these dances and tell us of a better way to supervise them, we will gladly accept their plan."

The letter was dated December 21.

Hiring of Coaches Attacked

A. C. Newell, chairman of the board, attacked the present system of hiring outside athletic coaches. Instances had come up in the past where men of highly improper character have had charge of high school athletic teams, he declared.

The present rule of the school board requiring two years' experience in outside teaching before a teacher can

COLLAPSE IS LAID TO FAULTY BUILDING

Senator Capper Has Statement on Theater Disaster.

INSPECTION IS CONDUCTED

District of Columbia Officials Are Blamed for Approving Cheap Construction.

WASHINGTON, Feb. 1.—Had engineering, coupled with cheap and faulty construction, was held responsible for the collapse of the roof of the Knickerbocker theater and the resultant loss of nearly 100 lives, by Senator Capper of Kansas, in a statement issued today after an investigation of the disaster.

Senator Capper, who as a member of the senate District of Columbia committee introduced a resolution of state brought two libel suits against Harry L. Kuck, editor of the Pendleton Tribune, each claiming to be damaged to the extent of \$10,000.

The basis of the complaints is that the Pendleton Tribune printed charges of crookedness in the handling of liquor prosecutions, which are alleged in the complaints to be untrue and of a malicious nature.

The suits are the outcome of a campaign of the local morning paper to bring about a grand jury investigation of charges that the prohibition enforcement was in many cases irregular.

The grand jury deliberated on evidence placed before it by 125 witnesses and reported at great length on the general law enforcing agencies of the county, after a week of investigation conducted by L. A. Liljequist, assistant attorney-general.

Clarke Grange to Meet. Free Tolls Over Interstate Bridge to Be Topic at Washougal.

VANCOUVER, Wash., Feb. 1.—(Special.)—The Clarke County Pomona grange will hold a two days' session at Washougal, Wednesday and Thursday, February 2 and 3.

The question of a free bridge will be discussed and the members during the lecture hour will be asked to answer, "Are you in favor of a free Columbia river interstate bridge at Vancouver by 1935? If so, why?"

Advocates of tolls point out that many miles of hard-surface pavement have been added to the highway by the tolls collected on the bridge.

Big Savings for the Thrifty Housewife

Few homes indeed do not feel the need of economy. The necessity of making every penny count touches the purse of every housewife. It is doubtful if there is a single article employed as a food or in the preparation of food that demands more buying wisdom than Baking Powder.

Upon its quality depends the success and economy of the bakings themselves. Calumet Baking Powder enables the housewife to make three worthwhile savings. She saves when she buys—it is moderate in price. She saves when she uses it—she uses only half as much as is required of most other powders. She saves materials it is used with and never permits bake-day failure. Any woman can use Calumet with absolute certainty of best results—delicious, tasty bakings that are pure and wholesome.

True home economy of time, material and effort is completely handled in Reliable Recipes, the 76-page Cook Book which would hint. A copy is yours FREE—for the asking. Address Home Economics Dept., Calumet Baking Powder Co., 4190 Fillmore St., Chicago, Ill.—Adv.

Twenty-Seven Ask Land

Applicants in Washington Average \$2708 Each.

OLYMPIA, Wash., Feb. 1.—(Special.)—The average assets of the applicants for tracts on the White Bluffs-Hanford land settlement project, as shown by the 27 applications sent into the department of conservation and development were \$2708, while the average cash on hand was \$309. Applications began coming into the department about January 11, and although only a few were received at first, during the past few days they have speeded up. Supervisor Shaflour, head of the project, said Monday and Tuesday morning.

Of the 27 applicants, 17 were world war veterans, two veterans of the Spanish American and world wars, and seven men who saw no service. One applicant stated he had a son who was killed after serving four years in the navy. The age of the applicants averages 34. While several of the men showed no cash on hand, they are all farmers who will have money when their crops are sold in the fall.

Failure to Send Children to School Brings \$28 Penalty

VANCOUVER, Wash., Feb. 1.—(Special.)—W. P. Smith, farmer, a few miles north of Amboy, who was arrested several months ago for refusing to send his three children to school, was fined \$28 with costs by Frank E. Vaughan, justice of the peace, today. Mr. Smith said he was making arrangements to send his children to school, but the judge thought he should have sent the children to school during January, so imposed a fine with the admonition that unless the children were sent to school at once he will be arrested again and the second offense will not be dealt with so lightly as the first.

Man Held Has Big Check

ALFRED BURKE ONE OF 54 ALLEGED VAGRANTS ARRESTED.

Note Declared Found and Shown to Pals to Bear Out Pretense of Having Money.

Alfred Burke, arrested on a vagrancy charge with a check for \$3000 in his pocket, was one of 54 men picked up for investigation upon order of Lieutenant Thatcher of detectives last night. The check was drawn on the Citizens' bank of Ashland, Or., payable to Eugene Mansfield and signed by Jean Sellinger. Burke told the officers that he found the check and had been showing it to pals to make them think he had money. He is held in jail while the check, which has a chance of being bona fide, is investigated.

Another member of the 54 was Andrew Rivers, who carried parole papers from the Washington state penitentiary showing that he had been paroled from a term of one to 15 years for larceny to go to San Francisco. He said that he had been in Portland for a week. With him were arrested five Mexicans, none of whom had money or could explain his presence in the North end.

Last month detectives made 276 arrests and during the last two months a total of more than 500.
