A Joy to Active Women-Cantilever Shoes

The women who know the practicability of short skirts, collarless necks, flexible corsets, can appreciate the advantages of Cantilever

These shoes are, in the first place, good looking. The spring shoe styles are so sensible that Cantilever Shoes are stylish. They're graceful, well shaped shoes; finely made; reasonably priced. LIGHT AND FLEXIBLE.

And they harmonize, like good pals, with the active life of the modern woman! They're flexible, easy, efficient—full of pep and go. They fit your feet, let the toes bend, the arches flex. They add wings to your walk.

Cantilevers are flexible like youth—not stiff like old age. They keep the well foot well by permitting good circulation and exercise of the foot muscles. They support a weak arch like a bandage round the instep and allow nature to strengthen the foot through the simple exercise of walk-ing.
