HILL PARTY GOES NORTH

**Development of Iron Ore Fields
Near Scappoose Indicated.**

After having spent a day in Astoria and Seaside, Louis W. Hill, chairman of the board of directors, Ralph Ruidt, president, and other officials of the Great Northern railway returned to Portland late yesterday afternoon and left shortly for Spokane.

One thing that the visit of the rail officials to this district has indicated is that the iron ore fields near Scappoose will be developed within a short time. For some time the company has had an engineer working in the district and making plans for the development of the iron ore deposits.

Mr. Hill is an ardent believer that Oregon events will be hastened by the development of an industrial standpoint by the development of her mineral deposits. He said while here that before many months have passed the people will see blast furnaces at work near Scappoose.

HEALTH FIGHT REOPENED

**Tacoma Officer Orders Vaccination
of Sherman School Pupils.**

TACOMA, Wash., May 12.—(Special.)—Re-opening of the contention between the anti-vaccinationists and the Tacoma health department loomed today when City Health Officer Kane notified Dr. E. A. Layton, school physician, that pupils of the Sherman school must be vaccinated within three days or be quarantined for a period of 13 days.

The order of the city health department will be enforced without question as far as the schools are concerned, the school board decided. The order arises because of the discovery of one case of smallpox. The child had attended school Monday and Tuesday last affected, so that all pupils have been exposed, said Dr. Kane.

The case at the Sherman school is the first to have appeared in any school of the city since the closing of the schools for a period of 13 days, two months ago, and the liberal vaccination of the children which attended the period of agitation. The child afflicted with smallpox had not been vaccinated.
