## Gallon of Red Crown takes you farther

Prove it for yourself. Get a fresh tankful of "Red Crown," and then feel the strength of your motor. Note the increased power on the hills. Note the smoothness of starting and acceleration. Keep track of your mileage, and you'll find that it pays to stick to "Red Crown."

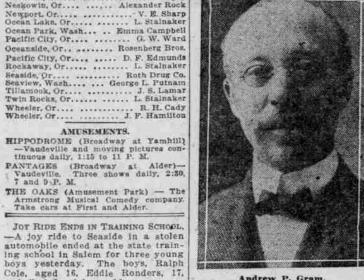

In six successive Los Angeles-Yosemite Economy Runs; all cars entered used "Red Crown" and nothing else. Here is practical, public recognition on the part of automotive engineers, that "Red Crown" meets the demand for a motor fuel that will vaporize rapidly and uniformly in the carburetor, and be consumed completely in the cylinders.

Use "Red Crown" exclusively and you will reduce carbon trouble to a minimum, do away with the need of carburetor adjustments, and enable your car to develop the maximum of power and mileage that its makers built into it.

Fill at the Red Crown sign-at Service-Stations, garages, or other dealers.
