Grain Trade Gossip.

(By Chicago Tribune Leased Wire.)

CHICAGO, Aug. 29.—W. A. Anderson, of the North Star Grain company. Winnipeg, was elected to membership in the Chicago board of trade today.

Speculation in grains is at a low ebb. It takes little buying or selling to cause changes of '§ to 1c in prices.

Houses with Omaha connections, the largest buyers of corn futures last week, owing to crop damage in Kansas and Nebraska, were heavy sellers of May during most of today.

The country is selling new corn for shipment by December 15 and later in a way that makes those conversant with the situation go slow in buying.

All stock and grain exchanges will be closed Monday, September 4.

A great deal of spreading is on between Chicago and Winnipeg wheat futures, Chicago is being bought and Winnipeg sold. December in the latter market closed it lower at 27%c, or 5%c under Chicago, while October there was 99%c, or 2%c under Chicago September. Winnipeg had 630 cars of wheat today, lagained 333 cars a week ago and 541 cars last year.

This possibility was carefully company had successfully completed the sale of a million dollars of first preferred stock of the company last week has put enthusiasm into bankers and bond dealers, who recall the time only a little more than a year ago when public utility securities were at a low a bb. But it's a different story now, according to Cameron Squires of the Ladd & Tilton bank. "Public utilities," says Mr. Squires, "are making money every where and their securities are enjoying a universal demand from the investment buying public. The feat of the North-western Electric company is being paraileled all over the country. One big utility corporation in Chicago sold preferred stock a year ago at areaut \$60 as share. The stock is now selling at \$95. Utility stocks in New York that sold under par a year ago are now bringing as high as \$140 a share."
