NEW LAW PROPOSED ON DEATH REPORTS

Special Cards to Be Used for Sudden Demises.

DR. PARRISH HAS PLAN

Members of Council Favor Requiring Doctors to Tell About Accident Cases.

As the means of giving the public greater protection, City Health Officer Parrish will propose to the city council the passage of an ordinance requiring physicians to report sudden deaths on special cards to the city health officer. It will be proposed that physicians be required to report the treating of all persons who have suffered in accidents, except where such treatment takes place in a hospital, where reports are now made. Members of the city council who discussed the plan yesterday favored it on the grounds that it would provide a means of investigating sudden, accidental or mysterious deaths which have not been looked if such reports are not made.

Aid in Investigation Planned. Under the city charter the city health officer of Portland is also registrar for the city, and the reports of all deaths and births must be made to him. At present Dr. Parrish demands information on all deaths that appear to be out of the ordinary, but it is felt that the reporting of sudden deaths would enable the city to obtain more information.

"I favor this plan," said Dr. Parrish, "for the reason that the registrar of the city of Portland should be acquainted with all facts concerning any death in the city of Portland. I have no criticism to offer against the county coroner, as our office has always had full cooperation from his office. But, regardless of this fact, the plan I am proposing will protect the public and will, if adopted, result in a great amount of good. The report of one sudden death or the proper investigation might perchance save the life of someone else."

Accident Reports Evaded. In connection with the reporting of treatment accorded to persons suffering from accidents, it was pointed out that in many cases this would be the only report that could be obtained. While the law now requires the reporting of all automobile accidents, many of such are not reported, it is said. It was said also that cases reported to be accidents have resulted from violence, but failure of reports to the authorities have prevented official inquiry and action.

The proposed legislation will probably be drafted by Dr. Parrish within the next week and submitted to the city council for its consideration.
