FOR THE BEST EFFECT THE HAT MUST MATCH THE GOWN.

A proper selection of accessories plays a much bigger part in the smartness of a woman's appearance than the average person realizes. The wrong hat or gloves may spoil the entire effect. It is well then to choose a hat of a color which will harmonize with any gown the wearer may possess, if economy is any object. The black and white hat is always good for all occasions, and the model shown, of alternate black and white look well with nearly any type of gown. It is unusually smart with the dress pictured, of blue satin crepe with underblouse of striped silk and dainty pleated frills turned back from the hards.
