guest's point of view may be often entirely unreasonable. The hostess may have all the facts and all the logic of the case on her side, but she does not insist upon pressing the argument quarrelsome, as the woman illustrated is doing. As it would be unprincipled to pretend to be convinced, the only thing to do is to let the subject pass tactfully as possible.

**Lots of Eggs, All Winter**  
Flock of 46 Hens Laid 39 Eggs a Day. Costs Nothing to Try.

"Have been using Doa Sung since Jan. 1st. My 46 hens are very healthy, and the extreme cold weather doesn't seem to affect the production. Last week they averaged 39 eggs a day. My pure-blooded flock is the center of attraction in the winter months. I'm Diefenderfer, Hughesville, Pa.  
If you think your hens can't lay an egg right through the winter months, you're making an expensive mistake. A little Doa Sung in their feed costs but a trifle, and shows a big difference in the egg record. Let us, at our risk, start your hens laying now. Here's our offer:  
Give Doa Sung to 15 hens. Then which results you want, we'll show you a big increase in eggs. If it doesn't pay for itself and a good profit besides, tell us and your money will be promptly refunded.  
Doa Sung is a Chinese egg-laying bird, directly on the egg-laying organs, and is beneficial in every way. It makes hens healthy and happy. They scratch and sing. Pulletts develop earlier. The whole flock lays regularly in any season, in any weather, when eggs are scarce and high.  
Can you afford to ignore the wonderful reports you are hearing from Doa Sung users everywhere? Let us show you the same results with your flock? Doa Sung is no trouble to use. It costs nothing to try. All we ask is a chance to prove our claims, at our risk. If it doesn't pay for itself, we'll refund 50 cents from your local dealer, or get Doa Sung from our headquarters, prepaid large size, \$1.00, holds three times as much as the small size. Doa Sung, 214 Columbia Bldg., Indianapolis, Ind.

## PEON PANTS IN EUGENE

University Freshmen Defeated in Plan to Remove Garment. UNIVERSITY OF OREGON, Eugene, Nov. 3.—(Special).—The one pair of peon pants which has made its appearance on the University of Oregon campus today without the trial of hostility, the only person in Eugene who could be found bold enough to venture forth adorned in tattered trousers is a prep at the University high school. A group of freshmen of the university today from the high school laid, marched en masse to the high school building with the intention of removing the pants. But the total student body of the high school supported the student in his wearing of the pants. Consequently the wrathful freshmen were confronted by the principal of the school, censured for their narrowness of mind and their intolerant views, to say nothing of their conservative ideas of dress, and were advised to right about face and march back to where they came from. The freshmen peaceably withdrew.

## Household Problems

MEDFORD, Or., Sept. 14.—Dear Miss Tingle: I should like to know (1) how to keep cream cheese, or in fact any cheese one might have at hand, I never buy great quantities, but even so, a pound is more than I can use in the preparation of most dishes. When I use cheese in a baked dish I never repeat it the week. I have not done this, preventing it from either molding or becoming so hard, I thought perhaps there might be a method of wrapping or a container suitable.  
(2) Is it possible to grate cheese in advance and keep it in jars?  
(3) Also I should like to know the correct table etiquette for the service of watermelon, as to cutting, chilling and silver used. It always seems so cumbersome. Graciously, N. W. C.

**BUY A "chunky" piece of cheese** (not a quarter or half pound at a time), cutting off the thin end for immediate use and coating the thick part with melted paraffine. This is easily removed when you wish to cut more cheese.  
Do not keep cheese in a closely covered container. A small, thin piece of cheese may be dipped in vinegar and wrapped in a vinegar cloth to prevent molding or drying for a few days.  
2. Grated cheese, made in advance, molds very easily in any container. The best way is to allow a thick, "chunky" bit of cheese to dry out hard and use this for grating as needed. The grated cheese used in choice Italian dishes is freshly grated from cheese that is so hard that it has to be cut up with a saw like wood.  
3. Watermelon is seldom served at a really formal meal. It is most ubiquitous when eaten informally—the more informal the better the results, so real watermelon experts tell us. For formal service it may have the pink pulp cut out in small balls with a French cutter (or in neat, small cubes), chilled and served either as a cocktail or as a dessert fruit, or as a salad, alone or in combinations.  
A simpler formal or rather semi-formal way is to serve the melon in round slices flat on a plate of suitable size, either with or without a paper doily. The melon should be well chilled, of course, and the green rind can be quickly removed with a round cutter of suitable size to allow the use of a smaller plate. All this handling of the melon does not tend to improve flavor or texture, however, and real melon lovers prefer to have it cut just before serving, and served quickly and in-

# The "Dry" and "Wet" Election Arguments

If the "wets" cut down the present overwhelming "dry" majority in Congress they say they will be satisfied and while they have endorsed 202 candidates for the House and Senate, their prediction is that they will increase the number of "wets" in Congress "by 70 or 75 over the present number." In the meantime the "drys" have been equally active, and the welkins throughout the land have been ringing with eloquence for and against alcohol. To bring all this to a focus on the eve of election and to present it in concrete form for the intelligent verdict of the voter, THE LITERARY DIGEST has wired the leading "dry" and "wet" candidates for their arguments, and gives them concisely in the issue of November 4th. This important news-article also presents half-tone portraits of Messrs. Joseph S. Frelinghuysen, New Jersey; Edgar R. Kiess, Pennsylvania; John G. Cooper, Ohio; Andrew J. Volstead, Minnesota, and M. Clyde Kelley, "dry" candidates for the Senate and House; also Governor Edward I. Edwards, New Jersey; Thomas Jefferson Ryan, New York; John Philip Hill, Maryland; Adolph J. Sabath, Illinois; and Julius Kahn, California, "wet" candidates for Congress. This article will furnish the readers with every argument that has been made on both sides of this nation-wide question, and coming as it does just a few days before election, it has a timeliness which adds to its value.
