

## MR. LAW SEEMS TO BE VICTOR

### Conservatives Winning in British Elections.

## LLOYD GEORGE WAY BEHIND

### Lady Astor Named, but by Much Smaller Plurality.

## LABOR MAKES BIG GAIN

### 39 More Seats Captured—Notable Victories Won in Big Industrial Districts.

LONDON, Nov. 15.—(By the Associated Press.)—At 6 o'clock this morning the returns in yesterday's elections indicated that Mr. Lloyd George's Conservatives were credited with a gain of 12 seats, the independent Liberals with 42 and the Georgeite Liberals two.

The returns showed the standing of the parties as follows: Conservatives 133, labor 66, Liberals 25, Georgeite Liberals 22, others 8.

The conservative party has returned more members to parliament than all the other parties combined, so far as returns completed Wednesday night show. The laborites come next and the labor party is considered due for congratulations. Labor's seats are all in the congested industrial areas, notably in Glasgow, where predictions that labor would triumph have been fulfilled, and the results of the last election overturned by a flood of laborite votes, the conservative and Georgeite Liberals are being ousted in several London districts.

This was the most striking feature of the returns, but may be balanced by counts to be made today.

Two members of the government were defeated, Colonel Leslie Wilson, chief conservative whip, and Colonel Stanley, under-secretary for home affairs.

All of the women candidates Lady Astor is the only one returned thus far.

The prime minister, Andrew Bonar Law, carried the central division of Glasgow by a comfortable majority, while ex-Premier Asquith had a narrow escape in his Paisley constituency, where he just missed out the laborite.

Colonel Arthur Lynch of Boer war memory, standing as a laborite in Hackney central, was defeated, being at the bottom of the poll. Lynch was colonel of an Irish brigade on the Boer side during the South African war. He was convicted of high treason, but was granted a full pardon by King Edward.

Colonel Bury Elected.

Colonel Howard Bury, noted explorer and one of the Mount Everest expedition, was elected on the conservative ticket for Wolverhampton.

Miss Susan Lawrence, laborite, was defeated by C. W. Crook, conservative, for Eastham, North.

Sir Alfred Mond, minister of health in the Lloyd George cabinet, keeps his seat in West Swanssea. Sir Henry Norman, Georgeite liberal, retains his seat for Blackburn, sharing representation of the borough, as before, with conservative Sir Harry Brittain, conservative, who was re-elected for the Acker division of Middlesex, defeating the laborite, Miss Richardson.

Labor won a big victory in Sheffield, Attercliffe division, C. H. Wilson capturing the seat from the Georgeite, T. W. Casey, by a vote of 16,295 to 7582. This is one of the biggest turnovers thus far, Casey being elected for the last time with a vote of 12,398 to the laborite candidate's 6528.

Another striking labor gain was in New Castle-on-Tyne, central division, where C. E. Trevelyan, one of labor's "intelligentists," defeated the retiring conservative, Sir George Renwick, 12,795 to 6629. Renwick had a majority of 4438 over the laborite in the last election.

Mr. Trevelyan was parliamentary secretary to the board of education in 1914 when he resigned from the government as a protest against the policy which involved Great Britain in the war.

In Wales, James Ramsay MacDonald, for the laborites, wrested the Aberavon division of Glamorgan-shire from the liberals. He polled 14,315, the conservative, S. H. Byass, 11,111 and the Georgeite liberal, Major J. Edwards, 5223.

## Conservatives Win Seats

Labor also captured East Swanssea from the liberals, the Keighley division of Yorkshire from the conservatives, the Brightside division of Ilkeston division of Derbyshire, where they ousted Lloyd George's follower, Major General J. F. B. Seely, who was secretary for war in 1914.

Among the conservative gains were East Cardiffe from Asquithians and the Peckham division of Camberwell from the Georgeites.

The Asquithians won Bethnal Green, southwest, from the conserv-

## SCIENTIST UNFOLDS SECRET OF LONG LIFE

### FUNCTIONS OF WHITE BLOOD CORPUSCLES REVEALED.

## Japanese Savant Announces He Has Developed Anti-Serum for Spotted Fever.

### NEW YORK, Nov. 15.—Discovery of the tissue-building activities of the white blood corpuscles, believed by scientists to point the way to the indefinite prolongation of human life, was outlined today by Dr. Alexis Carrell of the Rockefeller Institute, in an address before the National Academy of Sciences.

Dr. Carrell's statements were taken by many prominent scientists in his audience to indicate that the secret of longevity might be found through the discovery of a means of stimulating the activity of these corpuscles.

Dr. Carrell described the work of the leucocytes, or white blood corpuscles, which experiments had shown, he said, protected the body against infection and also stimulated the growth of new tissue and the regeneration of dormant cells.

He told of his experiments with animals, which had indicated that the white blood corpuscles stimulated the growth of new tissue "by setting free growth-activating substances in the tissues." He pointed out that in extreme old age new tissue grew to heal wounds and broken bones.

Hideyo Noguchi, a Japanese scientist, also a member of the Rockefeller Institute, announced he had developed an anti-serum for Rocky Mountain spotted fever, which now has a mortality rate of 75 per cent in the Rocky mountain and Pacific states. He said his serum would prevent the disease if the victim was inoculated within four days after he contracted it. Human beings, he declared, caught the disease through the bite of the wood tick and usually did not know they had the fever until six days after they had been bitten.

Dr. Carrell also announced that he had developed an anti-serum for Rocky Mountain spotted fever, which now has a mortality rate of 75 per cent in the Rocky mountain and Pacific states. He said his serum would prevent the disease if the victim was inoculated within four days after he contracted it. Human beings, he declared, caught the disease through the bite of the wood tick and usually did not know they had the fever until six days after they had been bitten.

He also announced that he had developed an anti-serum for Rocky Mountain spotted fever, which now has a mortality rate of 75 per cent in the Rocky mountain and Pacific states. He said his serum would prevent the disease if the victim was inoculated within four days after he contracted it. Human beings, he declared, caught the disease through the bite of the wood tick and usually did not know they had the fever until six days after they had been bitten.

He also announced that he had developed an anti-serum for Rocky Mountain spotted fever, which now has a mortality rate of 75 per cent in the Rocky mountain and Pacific states. He said his serum would prevent the disease if the victim was inoculated within four days after he contracted it. Human beings, he declared, caught the disease through the bite of the wood tick and usually did not know they had the fever until six days after they had been bitten.

He also announced that he had developed an anti-serum for Rocky Mountain spotted fever, which now has a mortality rate of 75 per cent in the Rocky mountain and Pacific states. He said his serum would prevent the disease if the victim was inoculated within four days after he contracted it. Human beings, he declared, caught the disease through the bite of the wood tick and usually did not know they had the fever until six days after they had been bitten.

He also announced that he had developed an anti-serum for Rocky Mountain spotted fever, which now has a mortality rate of 75 per cent in the Rocky mountain and Pacific states. He said his serum would prevent the disease if the victim was inoculated within four days after he contracted it. Human beings, he declared, caught the disease through the bite of the wood tick and usually did not know they had the fever until six days after they had been bitten.

He also announced that he had developed an anti-serum for Rocky Mountain spotted fever, which now has a mortality rate of 75 per cent in the Rocky mountain and Pacific states. He said his serum would prevent the disease if the victim was inoculated within four days after he contracted it. Human beings, he declared, caught the disease through the bite of the wood tick and usually did not know they had the fever until six days after they had been bitten.

## CHILE IS ROCKED BY THIRD QUAKE

### No Further Damage Reported at Capital.

## HELP SENT TO VICTIMS

### Relief Train on Way North With Provisions.

## AMERICANS ARE SAFE

### Dispatch From Desamates Region Unofficially Estimates Casualties at 2000.

SANTIAGO, Chile, Nov. 15.—(By the Associated Press.)—Strong earthquake shocks were felt at 12:25 o'clock this morning in the Copiapo and La Serena districts, where great loss of life was suffered in Saturday's quake, according to National Telegraph dispatches.

SANTIAGO, Chile, Nov. 15.—(By the Associated Press.)—The authorities at Coquimbo reported today that a strong earthquake, followed by a strong tidal wave, was experienced there at 25 minutes after midnight this morning. No further damage was caused.

Captain Hobart Campbell of the Chilean schooner Marta swam out from the Coquimbo mole in the face of the tidal wave accompanying the earthquake to his vessel in the bay when he saw it was in danger.

He was waiting near the mole for the return of his ship's boat when he saw the lights on his schooner moving about in an extraordinary manner. He successfully boarded the Marta by swimming.

President Alessandri left today to visit the zone devastated by Saturday's earthquake and tidal wave, lists of the names of those killed in the catastrophe came in over restored telegraph lines from many points, giving poignant reality to the disaster. While the official figures on the dead received at the ministry of the interior, making the total slightly under 900, had not been increased this forenoon, unofficial estimates of the fatalities still ran as high as 2000.

Today's message brought fresh stories of suffering among the thousands of homeless, and further details of the terrible violence from the earthquake and tidal wave, which laid low a score or more towns and villages.

Calamity is Widespread.

Official telegrams supplementing press reports confirm the great proportions of the calamity. These tell, among other details of 2000 refugees in Coquimbo, where the property loss was estimated at 7,000,000 pesos.

## WASHINGTON 'SAVED' BY AIR DEFENDERS

### 'ENEMY' RAIDERS ROUTED IN SPECTACULAR 'FIGHT.'

## ENTIRE FLEET OF HOSTILE BOMBERS CAPTURED; DEFENSE VICTORY HELD COMPLETE.

### WASHINGTON, D. C., Nov. 15.—Washington was "saved" from "enemy" raiders today when a defending squadron of army planes, warned by scouts, took the air and repelled the invaders in a desperate theoretical encounter. The victory of the defense was complete. The entire fleet of five hostile bombers was "captured" and after surrender of the "pilots" all hands went to lunch at Bolling field.

The attacking force consisted of five Martin bombers, which left Langley field, Virginia, this morning and under leader skies and through obscuring rain showers drove toward Washington, intent on "bombing" the White House, treasury, navy yard, War college, the capitol and other important government structures. Word that the "enemy" was on the way was all that reached the defending forces at Bolling field.

Three big scouting planes equipped with radio instruments shot into the air and circled southward, growing for contact with the enemy. Low visibility hampered their work, but finally the enemy machines were spotted down the Potomac river below Alexandria, and the word was flashed by radio to Bolling field, while the scouts maneuvered to keep the hostile craft in sight.

Back at the field three diminutive fighting planes of the type used by the air "aces" overseas shot up, circling their way high into the banked clouds above. They had scarcely disappeared from sight overhead before three heavier fighting craft followed them into the lofty ambush that was being laid for the enemy.

The distant grumble of the planes of the enemy bombers gave notice that they were at hand. The five big planes from Langley field came on with the target buildings they sought ahead and began swooping downward to the attack. From the clouds above dropped the six defending planes into the midst of the enemy and the battle of Washington was on. The fighters circled and twisted around the enemy machines in every maneuver of battle practice, picking off the bombing planes one at a time, until the last of the quintet had been forced to earth, theoretically.

The actual landing of all the planes was made at Bolling field, where the umpire ruled that the enemy had been repulsed and captured.

PARAGUAY REVOLT FAILS

### Government Reported to Be Overcoming Rebels.

ASUNCION, Paraguay, Nov. 15.—(By the Associated Press.)—Official reports on the status of the revolutionary movement issued today declare the government is overcoming the rebels.

Government troops have recaptured Carmen del Parana, between Villa Encarnacion and Cabupene, after a forced march of 14 hours, adds the official announcement, following the revolutionists in Villa Encarnacion.

## PRESIDENT BEGINS WORK ON MESSAGE

### ADDRESS TO BE MADE TO JOINT SESSION TUESDAY.

## CHIEF EXECUTIVE GETS DATA ABOUT RECONVENING OF HOUSES AND SHIPPING SITUATION.

### WASHINGTON, D. C., Nov. 15.—President Harding, after a conference today with Chairman Lasker of the shipping board, began work on his message to the extra session of congress.

The message is expected to be devoted almost entirely to a discussion of the pending merchant marine bill, as it has been explained at the White House that the president's desire to have action on this measure expedited was the main reason for calling congress in session two weeks in advance of the regular meeting. Other legislation, such as the desirability of amendments to the transportation act, may be touched upon by the executive, but it is generally believed by congressional leaders with whom the president has talked recently that presentation of detailed views on other subjects than the merchant marine bill will await the annual message to be forwarded upon the convening of congress in regular session, December 4.

The president, in beginning work on his message, had before him a large amount of data supplied by Chairman Lasker, all of it showing the present situation with respect to the government's war-built ocean tonnage and the necessity of prompt action by congress in the matter of a permanent policy. Mr. Lasker is expected to have several conferences with the president during the writing of the message.

Prior to the visit of the shipping board chairman to the White House, Senator Curtis, Kansas, republican whip of the senate, informed the president of arrangements for the reconvening of congress Monday. The senate will adjourn until Tuesday out of respect of the late Senator Watson of Georgia. The president, according to present plans will deliver his message in person Tuesday at a joint session of the senate and house.

MEXICAN FASCISTI BUSY

### Active Campaign Against Bolshevists Reported Planned.

MEXICO CITY, Nov. 15.—(By the Associated Press.)—Organization of fascist, wearing the federal tricolor, green, red and white, to combat bolshevism, is reported at Jalapa, state of Vera Cruz, in a dispatch from that city to El Universal today.

An active campaign against bolshevists is planned.

BRAZIL INSTALLS CHIEF

### New President, Arthur Da Silva Bernardes, Inaugurated.

RIO JANEIRO, Nov. 15.—(By the Associated Press.)—Arthur Da Silva Bernardes was inaugurated president of Brazil today before the chamber of deputies.

The United States, Argentina and Uruguay were represented by battleships.

WAR DANGER HELD PAST.

In diplomatic circles it is felt that the note precludes the danger of war before the convocation of the Lausanne peace conference.

The Kemalists reiterate their demand that all interference in the form of control by allied troops of the Turkish internal administration shall cease.

It is regarded as significant that the note makes no reference to observance by the Angora authorities of the Mudros armistice agreement of 1918 or the Paris note of the allies sent on September 25, the attempted violations of which constitute the purpose of the last allied note.

Relief to Move Headquarters.

The Near East relief is planning to transfer its headquarters and its administrative forces, together with its warehouses, from Constantinople to Greece. Uncertainty over the political and military situation and the insistence of the Kemalists upon imposing excessive tariffs upon relief supplies have prompted this decision.

Unless the Turks modify their policy all shipments now on the way from America will be landed at Piraeus, the port of Athens. Several relief workers left today for Athens. They include Charlotte Waller, Oakland, Cal.

ISMET, POINCARÉ CONFERENCE

### Delegate Asserts Turkey is Anxious to Restore Peace.

PARIS, Nov. 15.—(By the Associated Press.)—Ismet Pasha, head of the Turkish delegation to the Lausanne peace conference, discussed the near east situation today with Premier Poincaré, and at the conclusion of the interview declared:

"My three quarters of an hour conference with M. Poincaré was most satisfactory."

After a sleepless night and a busy day, Ismet received 50 or more correspondents at his quarters at the Hotel Crillon. "It is not certain that I will go to London," he said. "So far I have received no official invitation to do so."

"If there are any fresh incidents at Constantinople it won't be our fault. We want peace also. You may be sure that whatever we sign we will not violate."

Ismet said he had been officially informed that the Lausanne conference was still set for November 26. While photographers were busy with the flashlights, Ismet began a short speech.

"We want peace at Lausanne because we have a war-ravaged country in need of reconstruction. The world must not believe that we are militarists or that we are inflated by our recent successes. Mark my words, we are going to create a new Turkey in which there will be democracy as pure as in any western country. We intend to live independent nationally in every sense and the Turkish people will not renounce in any degree this independence for any reason."

In response to questions Ismet reiterated the intention of the Turkish government not to recognize the pre-war capitulations, which he asserted had been non-existent since 1914.

## TURKS PROMISE TO OBEY PACT

### Rupture Before Peace Parley Averted.

## ALLIES GET KEMALIST NOTE

### Intent to Respect Mudania Armistice Declared.

## ISMET MEETS POINCARÉ

### Delegate to Conference Forecasts New Turkey to Be Ruled by Democracy.

CONSTANTINOPLE, Nov. 15.—(By the Associated Press.)—Any immediate danger of a rupture between the allies and the Kemalists authorities seems to have been dissipated today by the receipt by the allies of a note from the Angora government declaring that the terms of the Mudania armistice compact will be respected by the nationalists and that there will be no insistence on the withdrawal of allied troops from the zones laid down in the Mudania convention.

The note, which had been eagerly awaited for several days, brought relief to the allied authorities and the population of the capital, who had seriously doubted the good intentions of the Angora government. It is felt here that the unfavorable reception of the Kemalists demands throughout the world caused them to reconsider their decisions and adopt a more conciliatory attitude.

War Danger Held Past.
