the change you wish made in the serge suit. The hipline must be made greater to be sure, but do you made greater to be sure, but do you want a one-piece out of it? Presuming that you do, I will plan for a combination of taupe or smoke gray canton crepe, joining at a rather low waistline your jacket and skirt, the latter to have a set-in panel in the pleated type at the sides and the revers on blouse and also the vest to be of the new material, embroidered in the royal blue, silver, black, henna and tan terial, embroidered in the royal blue, silver, black, henna and tan rope silks. The sleeves can be left in the coat type and edged with the hand work. The line for the blouse will be found in the issue as mentioned, page 30, No. 1338. The Jacket will not permit as bloused a line, but the effect will be equally good. For the skirt, a pleated panel attached to the skirt's sides will be necessary. With this change you necessary. With this change you will have a very practical and pleasing dress. If I have over-looked the thing you wanted kindly let me know, and I shall be glad to serve you.

Berva you.

Dear Madam Richet—Will you tell me how to trim my navy tricotine dress suitable to wear in an office? I do not cars to remodel the dress much. It is made very piain, just a little long-waisted, three-cuarier length sleeves, straight skirt width 52 inches, round neck, fasten on shoulder and under arm. It has a wide hom, so it can easily be made longer. It was beaded, but I took the beads off as they were not practical for the office.

I am 21 years old, height 5 feet 5½ inches, weight 138 pounds; have a very round face, bits eyes and brown hair. A little color would miprove it for me, I think. MIRIAM L DEAVER.

Miriam Deaver—For the trim,

Miriam Deaver-For the trim which shall be in keeping for the office dress, would you not like the black soutache braid and the little red wooden buttons used here and there in a small whirl design? I am so pleased to read that you felt the beads out of place for office wear. The plainer type of dress is in far better taste for professional duties. Many of the design books will give you a bint for the deco-rative line you would need for the braiding, and I am sure that the combination above mentioned will
