THE NEWEST OPTIMISM.

A going definition of an optimist is a chairman of a state republican acommittee who thinks he can get party legislation through the committee who thinks he can get party legislation through the comming legislation approached to the state senate along "republican party lines" so that "needed party legislation may be accomplished" and so that we shall have a "return to party responsibility in the affairs of state."

We would not discourage the hopeful chairman. Being chairman is his job and he is right to work.

In 1897 Clemenceau, who had just founded "L'Aurore" (The Dawn), proclaimed in its columns the innocence of Dreyfus. He denounced the irregularities and illegalities of the trial, showed complicity and urged the people to demand the granting of a new trial. Due largely to his championship, aided by Zoia, justice was won for Captain Dreyfus.

LICENSE LAW NEEDS REVISION

Smaller Fee on Autos and Large

Tax on Gasoline Advocated. ROSEBURG, Or., Nov. 30 .- (To the Editor.)—The time has come f people to adopt a fairer and tisfactory automobile license law Everywhere I go I hear dissatis faction expressed auto license law. It is unfair to the man of modest means who buys a second-hand car of medium or heavy weight for light family use, probably running it from 1000 to 3000 miles in a year, yet at present he pays as much license on his car that "mortal ken," and can be communicated with when the proper conditions are observed.

It seems strange that some people consider themselves so superior plays as much license on his car that that they can dictate to the beings of another world and fix the conditions under which they shall manifest in the material world. Might as well command the electric light as well command the electric light to burn without a vacuum.

Second-hand car of medium of 2008 weight for light family use, probably running it from 1000 to 3000 miles in a year, yet at present he cost him \$500 as another man with cost him five times that much and probably uses the highways five times as much and as well command the electric light to burn without a vacuum.

tions under which they shall fest in the material world. Might as well command the electric light to burn without a vacuum.

"The appearance in the true light is darkness to man. The real inner truth is directly contrary to that which is light to the natural man is darkness to the supernatural, and vice versa. "Matter is darkness, yet how plainly we see it. Spirit and soul are light, yet how few perceives them."

Any license law to be just should be arranged to tax a man according to the amount he uses the highways. Our present law does not do this. My plan is to charge a nominal license, say an average of around \$10, and then increase the gasoline tax enough so that the gasoline consumed by the citizens of Oregon would at least make up the deficit, then the tax on the gas used by tourists would greatly increase th

funds available for road construc-tion. Probably an increase of four cents per gallon on the present gas tax would be sufficient.

I believe that a gas tax up to ten cents per gallon, wisely spent in permanent road construction would be an investment and nor a inverbe an investment and not a luxury subscriber.

1. If the man or woman has less than half indian blood, the marriage would be legal and there would be will object to a reasonable gas tax 2. Write to the United States land office, new postoffice building. In writing state whether you wish to homestead or buy.

2. Write to the United States land object to a reasonable gas inx. I realize that certain difficulties attend the proper functioning of such a law, foremost of which is the competition along the state berders from dealers outside of our state. who can undersell the Oregon deale and divert the business to othe states where the tax is not so high The difficulty could be overcome to a very large extent if the Washing
