TURKEY RESENTS MOVE

Japan, Great Britain and Italy Line Up to Fight for Territorial Rights.

LAUSANNE, Dec. 3 .- (By the Associated Press.)-A review of the ond week of the near eastern conference shows clearly that the negotiations have reached a point of danger; the question of capitulations or special privileges enjoyed by foreigners in Turkey which was taken up yesterday may make or break the conference and this i so because an adverse decision of capitulation may so wound Turkish national pride that the Turks may don their fexces and go back to

Angora, Everybody realines the extremdelicacy and danger of the nego tiations on capitulations. The Turks have rejected all suggestions of the powers, including the United States, that the special privileges enjoyed by foreigners shall be retained, re especially an attempt to have foreign consular courts try cases involving foreign residents or for-

eign property. Lower Standing Opposed. informed the correspondent of the Associated Press today that they would resist any attempt to place Turkey on a lower international standing than "smaller and less im plete administrative independence. Dr. Riza said: "We hear tha the powers, including the United States, are thinking of substituting udicial guarantees for the hatefu

expression capitulations." "Insofar as foreign tribunals are concerned this will not do; it mean the same thing under a different name. And we object to a transitor; period whereby Turkey would be capitulations. We want complete case known to medical science. freedom now."

Japan Supports Powers. The leading European powers

have received important help from Japan in their struggle to keep the foreign courts in Turkey. Japan herself suffered the same humiliation as Turkey and sympathizes with the Turkish attitude. The Turks argue that complete

administration sovereignty is perhans the most selemn article of the new Ottoman national pact. America and Japan both lined u

with Great Britain and Italy Saturday when they took their stand against Ismet Pasha's contention that Turkey had wiped out all the capitulations, or extra territorial rights for foreigners, by declarin them null and void in October, 1914. Richard Washburn Child, spokesman for the United States, said that if any legal dispute should the Washington government

would be obliged to take the same expressed the belief, however, that common interests of all conuld make it possible to find satiscapitulations which are so distasteful to Turkey.

Ismet's Contention Opposed. Baron Hayashi for Japa had great sympathy with Turkey's dirilke for the capitulations, because his government once labored under the same system. Japan, however, had taken 20 years to build up legal system satisfactory to the foreign powers, and Turkey, he be lieved, would require the same time Ismet Pasha to consider this quertion with great seriousness.

Marquis Curzon for Great Britain, Marquis di Garroni for Italy, and M. Barrere and Bompard for France, also spoke in opposition to Ismet's contention that Turkey regards all the capitulations as void and will refuse anything in their place re flecting upon the sovereignty and independence of his country. Treaties Are Considered. Marquis di Garroni opened the sf-

ternoon session, which was devoted to the capitulations questions with the explanation that the sultan first induced foreigners to enter into pecial privileges and guarantees. The system worked admirably and the capitulations later were confirmed in treaties.

The Italian spokesman declared signed a year ago in Washington the allies were willing to do their 1000 officers and 8000 sailors were best to meet the Turkish objections retired from the Japanese navy to the special rights and privileges day. In addition 36 admirals and which foreigners enjoy in Turkey 292 officers of lesser rank were under guaranty of the treaties con-firming the capital ations, but he ex-(Concluded on Page 2, Column 1.) were placed on half pay.
