Indonesian Oil hold

of Java up to the island of Lombok near Bali. Three Japanese firms have secured concessions to the south and east of Borneo. This year South Vietnam is expected to grant 16 new undersea oil prospecting concessions in its offshore zones.

Singapore, the independent city-state and world port, is the center and headquarters of the Southeast Asian oil hunt. Here, since the British pulled out in 1969, it is the Americans, who call the tune. Official U.S. embassy statistics list over 2,500 American families connected with the oil industry and its related activities in the city. Their number is expected to have grown six times by the end of

this year.

This report confirms what may have feared for some time.. American policy under the Johnson and Nixon Administrations has been willing to slaughter over two million Southeast Asians, send to their deaths over 43,000 young Americans, maim and seriously injure another 150,000 American Servicemen, destroy hundreds of thousands of acres of Southeast Asian land, and risk the total upheaval of American society... all to serve the interests of a National Power elite noted for its total disregard for Public Health and Welfare and for its Brazen Subversion of the National Legislative process to serve its own narrow interests..
