

PCC board positions open

On April 3, 1979 voters of the Portland Community College District will elect members to fill five vacancies on the Portland Community College District Board.

To be a candidate for the Portland Community College Board of Education, a person must be a qualified voter of the Portland Community College District and must reside in the zone from which the person is a candidate.

All terms begin July 1, 1979 and end as listed: Zone 1, S.W. Portland, Lake Oswego, Tigard, Term — 2 years, Expires — June 30, 1981; Zone 2, North Portland, Scappoose, Term — 4 years, Expires June 30, 1983; Zone 3, East Portland (Madison and Marshall High School areas), Term — 4 years, Expires June 30, 1983; Zone 6, N.W. Portland, Beaverton, Term — 2 years, Expires June 30, 1981; and Zone 7, Western Washington County, Vernonia, St. Helens, Term — 4 years, Expires, June 30, 1983.

Persons seeking to become a candidate for a vacant position on the Portland Community College Board may do one of two things in accor-

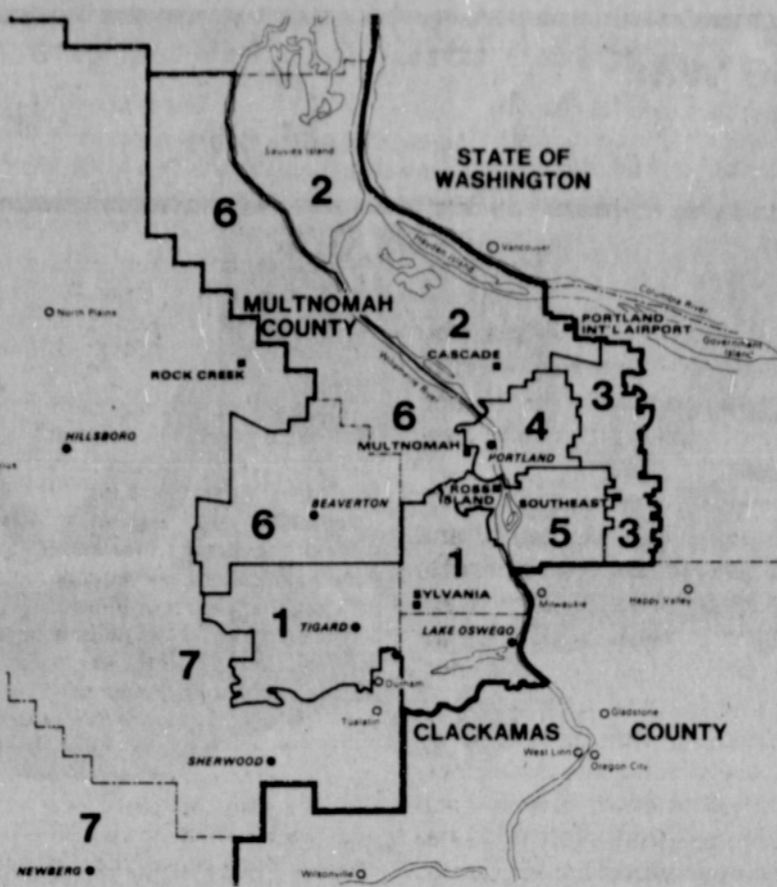

dance with Oregon Revised Statutes 259.070:

1. File with the Multnomah County Director of Elections a Petition of Nomination containing verified signatures of at least 25 registered voters residing in the Portland Community College District and in the zone from which the candidate is nominated, OR

2. File with the Multnomah County Director of Elections a Declaration of Candidacy accompanied by a \$10.00 filing fee.

The Petitions of Nomination and Declarations of Candidacy must be filed with the Multnomah County Director of Elections 35 days before the April 3, 1979 election. The deadline for filing is 5:00 p.m., Tuesday, February 27, 1979.

Further information may be obtained by calling the Multnomah County Director of Elections at 248-3720 or Portland Community College, 244-6111.

MEMBER OF UNITED CREDITORS

Weatherization saves taxes

SALEM — Oregonians who have weatherized their homes may be able to claim a credit on their 1978 state income tax returns. Homeowners can take a credit of \$125 or one-quarter of the cost of weatherizing, whichever is less.

The tax credit must be claimed for the tax year in which the weatherization materials were installed, with one exception. On 1977 tax returns, the credit was denied to persons who had work done but had not yet paid for the work. The Oregon Department of Revenue will honor credits on 1978 returns from those taxpayers who weatherized after October 4, 1977 but were turned down because the work had not been paid for. As the law is now being interpreted, the credit may be claimed for expenses incurred, but not necessarily paid for, such as under a long-term weatherization loan.

Acceptable weatherization work includes items such as insulation, storm windows and doors, weatherstripping, caulking, glass fireplace screens or fireplace grates with heat exchangers. A list of qualifying items is available from the Department of Revenue.

Work must be installed to meet requirements of the state building code and must be certified by a building inspector or contractors. The weatherization certificate must be attached to the return.

The home being weatherized must be in current use. New homes under construction do not qualify. Mobile homes do not qualify.

The game's a pain when frolicking, rollicking winter weather roughs up your home heating bill.

So blow the whistle on cold's foul play.

Wintertime's weather has pounced on us now, bringing the cold and snow. While heating systems work overtime to keep your home at a comfy 68 degrees, temperatures outside dip below freezing. Whipped by winds

of thirty miles an hour and more, the chill factor drops temperatures further. Your hands grow numb as you struggle with tire chains to keep your car straight on frozen ice-slicked roads. Maybe the cold, brisk air is invigorating... until the postman delivers winter's first home heating bill. Then you want to scream.

Yes, wintertime weather runs roughshod over home heating costs. And shorter days mean more electric energy for heating and lighting your home. That's why home heating costs are higher. But, with the help of Pacific

Power, there's something you can do about it. And, for greater economy, you can do it yourself.

Start with a visit to the people at Pacific Power. They've got a

fistful of brochures and pamphlets that show a lot of ways to cut down the cold. And they're all free.

Then, do it yourself: extra insulation, weather stripping, storm windows, water heater wraps and more. All you need are a few common tools, a little bit of time, and Pacific Power's free guides. You'll blow the whistle on cold's foul play. And save even more when you do it yourself.
