## All-Americans from Oregon

Ray Pittman, head coach of the Peninsula Wrestling Team, took 33 young high school wrestlers to the Junior Nationals Wrestling Tournament in Cedar Falls, Iowa, and returned to Portland with the gold, and a large group of All-Americans.

Jim Phillips — Lebanon H.S.  
Gary Seaney — Tillamook H.S.

### GOLF TOURNAMENT CANCELLED

The Black Colleges Committee of Oregon golf scramble scheduled for August 27, 1985 in Salem, Oregon, was cancelled. The tournament's celebrity guest, Mr. Lee Elder, was forced to withdraw.

Physical exhaustion and orders from his physician, Dr. Vincent Roux, to rest was the reason for the cancellation of the fundraising tournament.

FRONT ROW (L-R): Ross Aylett, Wendell Messner, Trent Stewart, Tad McNeely, John Gallego, Broderick Lee, Lawrence Hobson, Roy Pittman, Bruce Glenn. ## YOUR WATER: IS THERE MORE THERE THAN MEETS THE EYE?

**FACT:** Millions of private and public wells never have been tested for contamination. But when the U.S. Environmental Protection Agency (EPA) randomly checked 466 municipal wells in 1981, it found that 99 contained toxic chemicals.

**FACT:** Chlorine reacts with organic material in water to form Trihalomethanes (THMs). The EPA reports that THMs are not considered dangerous at the low levels found in most municipal water systems. But THMs are suspected cancer-causing agents.

**FACT:** In 1980, the U.S. Government's Council on Environmental Quality reported that chlorine added to water increased the risk of urinary-tract and gastrointestinal cancer.

**FACT:** Bottled water isn't regularly monitored for some toxic chemicals, except in states like New York where monitoring is required. In 1982, the Suffolk County, New York health department tested bottled water sold in the county and found potentially hazardous chemicals in 46 of 110 brands.

**FACT:** The EPA has identified serious groundwater contamination in 34 states.

**FACT:** The United States Geological Survey pinpoints sources of contamination in every state.

Once a ground water supply is contaminated, it can take generations to clean it up. And though government, industry, and municipalities are doing a better job, many of us want the best possible water now — not sometime off in the future.

IS THERE ANYTHING YOU CAN DO?

# YES!

A pure and simple solution to improving water quality is the Amway® Water Treatment System. Effectively removes: Pesticides, Herbicides, Industrial Chemicals, Chlorine and THM's (suspected cancer causing agents at high concentrations), Giardia Lamblia, and a host of other contaminants.
