

John Linder (R), brother of Benjamin Linder, the 27-yr-old engineer who was "assassinated" in Nicaragua by Contra forces, responds to a question during a press conference Sunday. The press conference was held to present the opinion of Dr. Michael M. Baden, director of the New York State Police Forensic Sciences Unit. The New York City pathologist review the autopsy report, photographs and written statements & concluded: "A gunshot wound of entrance to the right temple and that the muzzle of the weapon was less than one inch from the skin at the moment of discharge" caused Linder's death. Also at the press conference were family members Miriam, Elizabeth and David. The family will begin a speaking tour in several days to explain the truth about Ben's life and death.
