State Of Oregon Department Of Corrections Engineering Services Proposals due 3:00 pm, Sept. 17 Request For Proposals

Published Notice

The State of Oregon, through its Department of Corrections (DOC), is seeking proposals from qualified engineering firms to survey, design and produce drawings and specifications to replace the remainder of the existing sewer system that serves the Oregon State Correctional Institution (OSCI), Salem, Oregon. Presently, approximately 1/2 of the sewer lines has been replaced with a new 18" main line.

Project Description

The Department of Corrections wishes to accomplish Phase II of the project to replace the entire sewer system serving the Oregon State Correctional Institution, Santiam Correctional Institution, Mill Creek Correctional Facility and Western Baptist College. To date, all of the sewer lines on state-owned property (approximately 11,000 feet of sewer line) has been replaced, with an additional 9-11,000 feet remaining. All of the main lines upstream of the Mill Creek Crossing and approximately 1,000 feet of line below have been replaced.

The selected engineer will provide survey data including easement descriptions. Engineer shall design and produce drawings and specifications for the remainder of the sewer line west of the Mill Creek Crossing including crossing the creek. At present there is a 12" sewer line under Mill Creek. On either side of Mill Creek, a new 18" line has been installed. The selected engineer will provide the best possible, most cost effective method to cross Mill Creek and connect the 18" lines together.

The sewer system was constructed in the early 1950's using mortar-jointed concrete pipe. It discharges into the City of Salem's collection system. Since they were built, the sewers have collected large quantities of I/I especially during the wet winter months. Several efforts have been undertaken to reduce I/I flow into the system.

The Department of Corrections wishes to retain a qualified engineering consulting firm to assess the collection system and determine the extent of deficiencies; design improvements to the collection system west of Mill Creek which will significantly reduce I/I flows; and to provide services during the bidding and construction phases.

A mandatory pre-proposal meeting will be held on September 3, 1993 at 2:00 pm, at the offices of the Department of Corrections, Facilities Division, 470 Lancaster Drive NE Salem, Oregon. Copies of the Request for Proposals can be obtained from Elizabeth Ruddiman, Department of Corrections, 470 Lancaster Drive NE, Salem, Oregon 97301, (503) 373-1572. Proposals are due at the same address by 3:00 pm, September 17, 1993.

Late submissions will not be accepted.
