

What Are Your Wishes?

We're trying to figure out what your transportation system will be like in the next five years. There are choices and trade-offs, and we would like your help in making the decisions.

We can't guarantee that your wishes will come true. But we do want to know what you want your transit system to do for the Portland metro area.

Tell Us Where To Go.

And when to go, where to stop, how to get there, etc. We want to put resources where they do the most good for the most people. This means establishing region-wide priorities, which begin by listening to your transit priorities.

Why do we ask, you ask? Our job is to make sure you get around quickly and easily. We want to provide you more attractive, efficient travel choices, so you don't have to drive everywhere. To do that, we have to know what you need and want from us.

What's The Big Deal?

A great transit system isn't the only answer to the future livability of this area. But it's an important part of the answer. There will be 500,000 more people living in the metro area within 20 years. That means another 41,000 cars added to today's rush hour congestion. Some experts predict that Portland area traffic will soon be as bad as Seattle's.

Traffic congestion and air pollution aren't inevitable parts of growth. They're the result of careless planning. Right now we're planning for the future. That's where you come in. It will be a lot easier if you tell us ahead of time what we can do to make Tri-Met a smart choice for you.

Do Something!

We're not kidding when we say we want to hear from you. You have three options:

1. Do nothing and hope that someone else cares enough to get involved.
2. Take 2 minutes to do the "Wish List" and mail it or FAX it to us.
3. Join us at an upcoming community workshop. Several are scheduled, and you can take the bus or MAX.

Take your choice or take both opportunities. Just let us know what's on your mind. We're waiting to hear from you.

My Tri-Met Wish List

Tell us what you think should be Tri-Met's highest priorities. Here's how you do it.

1. Assume you have 10 bundles of money.
2. Distribute these 10 "\$" to the items listed here by placing the number of dollars to the items you think are most important.
3. You may distribute them however you wish. The higher the priority, the more "\$" you may wish to give to that item.
