At which \$24 billion corporation do Black executives help call the shots?

Black executives are helping shape the future at McDonald's.® From lawyers and accountants to construction engineers and architects, they're defining solutions to today's problems while facing tomorrow's challenges.

Yet, there's more to their story than just handling tough jobs with major responsibilities. Many of these same people who now hold key positions and make important decisions, joined McDonald's as crew employees and worked their way up.

Sure they have different jobs, but these executives all share one thing in common: A burning desire to be the best they can be. And at McDonald's, that's what it takes to be a success.
