BECAUSE *driving* ISN'T ALWAYS
A WALK IN THE PARK.

The harshest roads aren't necessarily located out in the boonies. And they're not tamed by cowboys named Hoss and Jake. But by people named Tony and Susan on the way home from the firm. And when the road resembles craters on the moon, the Blazer® Driver Control System makes the trip a lot easier and more comfortable.

Just because the road is paved doesn't mean it's smooth.
