

**This Ferrari  
flies at  
190 mph...**

**we  
help keep it  
grounded.**

**GOODYEAR**

Goodyear recommends drivers observe posted speed limits. 190 mph refers to speeds on the Autobahn. © 1999, The Goodyear Tire & Rubber Company. All rights reserved.

**Goodyear Eagle F1** The Eagle F1 GS-Fiorano is a guidance system for land-bound missiles like the Ferrari F550 Maranello. Designed by some of the best racing tire engineers on the planet, it bristles with technology derived from Goodyear Racing Eagles. Its track-proven, multi-radius profile provides precise handling. And a directional, asymmetric tread sweeps

water away for outstanding wet traction. Yet this Eagle also delivers a ride that's exceptionally stable. It's little wonder why we named it after Ferrari's fabled test track. For a thorough grounding in state-of-the-art, ultra-performance tires, get a set of Eagles. And fly. Visit our website at: [www.goodyear.com](http://www.goodyear.com).

**Goodyear. Number One in tires.**
