## The Twenty-First Century City

### RESURRECTING URBAN AMERICA

Regnery Publishing, Inc.; 1997  
By Mayor Stephen Goldsmith

America's cities can be saved—so says Indianapolis Mayor Stephen Goldsmith. As the mayor of America's twelfth largest city he eliminated city deficits, cut the city payroll, enhanced services, rebuilt infrastructure, revitalized neighborhoods, and reduced crime. And he did it all while cutting taxes! Now, in *The Twenty-First Century City*, Goldsmith shows how he did it.

This book comes at a crucial time, when government power and responsibility are being returned to state and local levels. America's decaying urban areas are being held responsible for solving their own problems. And meeting these challenges is a new breed of mayor—Democrat and Republican alike—resurrecting urban America.

Mayors Rudy Giuliani of New York City and Richard Daley of Chicago launched successful wars against crime—ending fear, cleaning up graffiti, and rejuvenating communities.

Mayors John Norquist of Milwaukee and Michael White of Cleveland pioneered the movement toward school choice and school voucher programs. Mayors Edward Rendell of

Philadelphia and Susan Golding of San Diego spurred economic growth for their cities by slashing red tape and taking on the special interests in order to eliminate unnecessary regulation.

### THE QUICKENING OF AMERICA

Jossey-Bass, Inc.; 1994  
By Frances Moore Lappé and Paul Martin Du Bois

Quickening... first stirrings of life, entering a phase of active growth and development.

CHANGE is the watchword of the nineties, and THE QUICKENING OF AMERICA is first and foremost about change. Lappé and Du Bois criss-crossed the country to witness the stirrings of a grass-roots movement. Regular Americans are coming together to change their workplaces, their communities, their schools, their lives. This deeply personal, inspiring and interactive book is full of practical advice on how to get involved in democracy. Transcending the tired polemics of the past—left and right, liberal and conservative, rich and poor—THE QUICKENING OF AMERICA demonstrates the powerful effect individual citizens have in our country.

Part One distills the key insight of successful citizens. Through the voices of everyday Americans, you'll understand why rethinking self-interest, power, and public life is the key to bringing new meaning and effectiveness into our lives.

In Part Two you'll meet effective citizens who are successfully tackling America's biggest problems—from education and government to human services and jobs and the media. How are they succeeding in changing their lives and improving their futures? From a factory in Massachusetts to a classroom in Ohio and a radio station in Texas, regular Americans are applying the lessons we all need to learn in order to create the lives we want...and a country that works.

Part Three looks at the quickening

of democracy's development through another lens. Here we ask, what are the skills we Americans need in order to be effective? How can we become problem solvers ourselves?
