

INTRODUCING THE ALL NEW

HANDLES THE SPOTLIGHT AS EASILY AS IT DOES THE ROAD.

Honestly, you could deal without the lights and the crowd of people watching you. Only problem is, they can't seem to deal without you. Maybe it's the available voice assisted navigation system that has them looking. Could it be how effortlessly you back into a parking space using the available rear camera? Or maybe it's the commanding attention from the lion's growl in the form of the most horsepower available in its class (380hp with a V8 engine). Whatever it may be, when you drive the all new 2007 redesigned Yukon Denali, you'll have to get used to everyone loving the way you shine.
