Cast Iron Portland

Salvaged artifacts celebrate history

Cast Iron Portland, an exhibit telling the story of Portland's rich cast iron history and the local industries that developed to support it, takes place through the fall at the Architectural heritage Center, 701 S.E. Grand Ave.

Rare and beautiful cast iron artifacts salvaged by Jerry Bosco and Ben Milligan and others will be exhibited in the context of the buildings they originally adorned.

Portland boasts the second largest collection of cast ironfronted buildings in the nation, outside of New York City's Soho district. Beginning in 1854, 180 cast iron ous "fire proof" material ei- 1899.

Lavish cast iron portraits are some of the rare and beautiful artifacts from Portland's history on display at the Architectural Heritage Center, 701 S.E. Grand Ave.

buildings were constructed in ther structurally or decora-Portland, using this marvel- tively, with the last built in ries developed lavish patterns

Local architects and foundand created magnificent

buildings that established a strong architectural unity that has never been equaled.

It was not to last. The wrecking ball's zeal erased more than half of these buildings in the rush to "modernize" downtown Portland, in the 1940s and beyond.

But our city's surviving cast iron legacy is so rare and remarkable that the concentration of these buildings in Skidmore/Old Town led to the district's designation as a National Historic Landmark the highest ranking for historic places in the United States.

The exhibit celebrates the surviving cast iron buildings, along with the importance of the landmark district and other buildings.

Efforts and opportunities to encourage the reuse of entire cast iron facades - rescued by the late Eric Ladd, Bosco & Milligan, and the old Friends of Cast Iron Architecture - are also explored.

The Architectural Heritage Center is open 10 a.m. to 4:30 p.m., Wednesday through
